Page 5	Page 7
<p>1 MR. SIMMERS: Will be court reporter 2 please swear in the witness. 3 DOUGLAS JOHN BOWER, 4 being duly sworn, 5 testified as follows: 6 DIRECT EXAMINATION 7 BY MR. ANGINO: 8 Q What is your full name? 9 A Douglas John Bower. 10 Q What is your office address? 11 A 220 Wilson Street, Suite 109, Carlisle, 12 Pennsylvania. 13 Q Are you a physician? 14 A Yes, I am. 15 Q And can you tell us just briefly about 16 where you went to college and medical school, and 17 did your internship and residency? 18 A Okay. I went to undergraduate and medical 19 school at Boston University, Boston, Massachusetts. 20 I did my internal medicine residency and internship 21 at the Naval Hospital in San Diego, and served in 22 the Navy as an internist for nine years prior to 23 joining the practice here. 24 Q As far as dates, would that have been 25 college done in 1984, medical school done when?</p>	<p>1 have for cross. 2 Before we continue, just so we know for 3 the record, any objections we will stop the 4 videotape and we will place them on the transcript. 5 MR. ANGINO: That's a good idea. We 6 don't want to waste any more video than we need to. 7 BY MR. ANGINO: 8 Q Doctor, with regard to Masland, when did 9 you first begin your practice here? 10 MR. ANGINO: Do we have DND, do not 11 disturb kind of thing? 12 MR. SIMMERS: Off the record. 13 (Off the record.) 14 MR. SIMMERS: We are back on the video 15 record. The time is 3:26 p.m. 16 (On the video record.) 17 BY MR. ANGINO: 18 Q Doctor, with regard to your practice at 19 Masland's, when did that start? 20 A December of 1993. 21 Q And did you shortly thereafter have as a 22 patient Mr. Mazzamuto? 23 A Yes, I did. 24 Q Can you tell us as far as your practice 25 whether there is any emphasis or at least</p>
Page 6	Page 8
<p>1 A College 1976 to 1980. Medical school 1980 2 to 1984. Internship 84 - 85, and residency 86 to 3 88. 4 Q And when you completed all of that, were 5 you board certified in any particular specialty? 6 A I was board certified in internal -- I am 7 board certified in internal medicine as of September 8 of 1988. 9 Q Could you tell the jury what internal 10 medicine is? 11 A Internal medicine is the nonsurgical -- 12 treatment of nonsurgical diseases of adults usually 13 in terms of things such as arthritis, diabetes, 14 heart disease, lung disease. It also now 15 encompasses primary care, which is, again, basically 16 the general care of patients as their first 17 provider. 18 Q And with what medical association are you 19 currently a partner? 20 A I'm a partner at the Masland Associates. 21 Q Located in? 22 A In Carlisle, Pennsylvania. 23 MR. ANGINO: Any questions as to 24 qualifications? 25 MR. WOLGEMUTH: I will reserve what few I</p>	<p>1 preponderance of individuals as far as age and 2 chronicity of their complaints? 3 A Well, in internal medicine most of our 4 patients tend to be older and even elderly. We see 5 many patients with chronic medical conditions, 6 again, such as blood pressure, arthritis, diabetes, 7 heart disease. So the majority of our patients, 8 and, in fact, most of our reimbursement is actually 9 of the Medicare age group. You know, we do see 10 younger patients as well, but I would say the 11 majority of our patients are older patients with 12 chronic disease management. 13 Q You don't deliver babies or take care of 14 children, and things like that? 15 A We do not deliver babies, we don't take 16 care of children. We don't do major surgical 17 procedures. 18 Q So that of the things that you do do, you 19 do a lot of that, is that right? 20 A That is correct. 21 Q Would one of the areas that you see a 22 number of patients be the area of the back and back 23 complaints? 24 A Low back pain is a very common problem in 25 seeing chronic -- in many older people.</p>

Page 9

Page 11

1 Q And are you able to diagnosis back
2 conditions?

3 A We often are the people who diagnosis back
4 conditions that leads -- initiate treatment.

5 Q So that you not only would diagnosis the
6 back condition, you would initiate treatment, and if
7 sometimes they get complicated or if they need
8 surgery, then do you refer them to specialists?

9 A Yes. We refer on to surgical specialists,
10 either orthopedists or neurosurgeons, as well as the
11 allied health field such as physical therapy.

12 Q With regard to these older patients, do
13 they sometimes have conditions such as anxiety, and
14 depression, and emotional problems?

15 A Sure. It's very common.

16 Q And do you take care of them?

17 A Yes, we do.

18 Q Do you likewise diagnosis and medicate
19 them?

20 A Yes, we do.

21 Q And, again, if the condition gets to be
22 severe, do you refer them on occasion?

23 A We do refer on occasion although mental
24 health assets in central Pennsylvania are not easy
25 to come by. There are not many psychiatrists in

Page 10

Page 12

1 this area, so we do a lot of the primary management
2 of psychiatric problems with traditional
3 antidepressant and antianxiety medications.

4 Q Thirdly, I assume if people who are older,
5 many of them have heart conditions, is that right?

6 A Very common, yes.

7 Q And, again, you diagnosis and treat them,
8 is that right?

9 A Yes we do. Yes, I do.

10 Q And, again, if there are situations such
11 surgery or certain kinds of specific tests, you
12 refer them on to other people?

13 A We refer to the cardiologist for that,
14 that's correct.

15 Q With regard to Mr. Mazzamuto, did he
16 develop a back condition back in 1996?

17 A Yes, he did.

18 Q And do you have your records?

19 A I have my records with me, yes.

20 Q With regard to Mr. Mazzamuto, was he in
21 1996 sent for what they call an MRI?

22 A Yes, he was.

23 Q And I am handing you what we will mark as
24 P-1.

25

1 Copy of document entitled
2 Carlisle Hospital and
3 Health Services, Department
4 of Radiology, Carlisle
5 Imaging Associates, P.C.,
6 dated 06/05/1996 - produced
7 and marked for
8 identification as Exhibit

9 No. P-1.

10 MR. ANGINO: What we can do is with
11 regard to these we will mark them after we are done.
12 Is that satisfactory if we go through them?

13 MR. WOLGEMUTH: Okay. I'm going to place
14 an objection on the records. Can we go off the
15 video.

16 MR. SIMMERS: Yes. Off the video
17 record. The time is 3:30 p.m.

18 (Off the video record.)

19 MR. WOLGEMUTH: I'm going to do this now,
20 Richard, so I don't interrupt you later.

21 I certainly don't mind him referring to
22 these exhibits, and testifying from exhibits, and,
23 you know, if he relied upon them, he can -- but I
24 don't want them attached to the transcript as an
25 exhibit. I believe the only one that I would not
26 object to attachment would be the portion of the
27 Attending Physician's Statement, not the November 3,
28 2000 report, and I guess it's an Attending
29 Physician's Statement dated it looks like 8/29 --

1 I'm not sure what that is, 00 or O1.

2 MR. ANGINO: What we will do is your
3 objections are noted. When we get to Court, it's
4 not so much being attached to a deposition, we are
5 going to be at trial, so the Court will have to make
6 a decision. The Judge will have to make them a part
7 of the record. Whether he would let the jury see
8 them or whether they would go out with the jury will
9 be decisions that he will make.

10 MR. WOLGEMUTH: That's fine.

11 MR. ANGINO: All right. Back on the
12 record.

13 MR. SIMMERS: Back on the video record.
14 The time is 3:31 p.m.

15 (On the video record.)

16 BY MR. ANGINO:

17 Q Doctor, within your file did you have what
18 is noted as P-1, a Carlisle Hospital, Department of
19 Radiology, MRI?

20 A Yes, we did.

21 Q And can you, first of all, by stating what
22 is radiology, and what is an MRI?

23 A Well, radiology is a field of medicine
24 which attempts to obtain images of internal body
25 structures through various means. You can use

Page 13

1 x-rays, you can use sound waves, which is called
2 ultrasonography, or you can use MRI, which actually
3 uses the body's own magnetic emanations under the
4 field of a magnet field to obtain computerized
5 reconstructed pictures of internal body parts.

6 Q And as a result of complaints that
7 Mr. Mazzamuto was having with respect to his back,
8 did you refer him to a specialist in radiology?

9 A Yes, we did.

10 Q Is this customary in your profession to
11 refer individuals to radiologists, and to reply upon
12 the reports that you get back?

13 A Yes. As the field of radiology has gotten
14 more and more complex, the studies are more and more
15 difficult to read for people who don't do it on a
16 regular basis, so, therefore, I find that I need to
17 rely upon the expertise of the radiologists for
18 their readings of complex films such as CAT scans
19 ultrasounds, and MRIs.

20 Q With regard to those reports, do you rely
21 upon them in your treatment as to medications, and
22 how you treat particular patients?

23 A I rely upon them for all those things.

24 Q With regard to what's been marked as P-1,
25 could you start with the second full paragraph,

Page 14

1 there is spinal stenosis, and just read that
2 paragraph were the impression please?

3 A Okay. There is spinal stenosis. The AP
4 diameter of the canal is smoothly and considerably
5 narrow, and this is most prominent at the L3-4 disk
6 level. There is no significant disk herniation or
7 bulging, and this is thought to be due to
8 developmental stenosis rather than to disk
9 herniation or hypertrophic changes of the facet
10 joints. The stenosis gradually dissipates above and
11 below these levels. The cerebral spinal fluid in
12 the area of the stenosis does not appear bright.
13 This is probably due to the relative lack of fluid,
14 with crowding of the nerves roots, as well as loss
15 of fluid signal due to increased flow to this area
16 due to the stenosis. No focal intrathecal mass is
17 seen. Marrow signal was normal.

18 Impression. Central spinal stenosis which
19 gradually worsens to a maximum at the L3-4 level.
20 This probably extends from L2 though approximately
21 the L5 vertebral body levels.

22 Q All right. Doctor, on your desk is a
23 spine. Could you use it to tell the jury what part
24 of the anatomy we are dealing with, and perhaps if
25 you can explain what disks are, and what the various

Page 15

1 vertebral bodies are, and the spinal cord, things
2 such as that?

3 A Okay. Well, this is a model of the lower
4 part of the spine. The spine is divided into
5 several spots -- parts. The neck is the cervical
6 spine, in the chest it's the thoracic spine, the
7 lower back is the lumbar spine, and the very bottom,
8 which is called the tailbone, is also the sacrum,
9 which is actually five vertebrae fused together into
10 one.

11 You know, the spine is put together by a
12 series of vertebral bodies, individual bones, which
13 are held together by a disk and various ligaments in
14 the back.

15 Now, the disk is here, this robbery
16 component, in between the two bony bodies of these
17 vertebrae. This is the first lumbar vertebra, this
18 is the fifth lumbar vertebra, and the numbers are
19 sequential.

20 The disk serves as a space or point of
21 attachment for the spine. It's a tough fibrous band
22 circumferential with a gelatinous core, acts as sort
23 of a shock absorber. You know, back pain can come
24 from the disk if the disk is degenerating. If it
25 ruptures, the core of -- the gelatinous core can

Page 16

1 sometimes protrude through the rupture of the
2 fibrous outside, and actually impinge on the spinal
3 cord or the nerve endings. So that's one cause of
4 low back pain, and that's one of the reasons we get
5 MRIs, is to see if a disk is ruptured. In
6 Mr. Mazzamuto case that was not the case.

7 The spinal cord actually runs behind the
8 large bodies of the vertebrae within an arch that's
9 made up of bony prominences coming from two
10 sequential vertebrae. You have the spine off the
11 back, and you have the lateral portions of the next
12 vertebra forming a canal, which, if you look at it
13 on end, you can see there's a space where the spinal
14 cord runs.

15 Q Is that red thing the spinal cord?

16 A That's the -- it's a yellowish --
17 yellowish --

18 Q Okay.

19 A -- robbery model here.

20 If there is spinal stenosis, what it means
21 is that this canal here behind the body of the
22 vertebrae becomes narrowed, and that could become
23 narrowed for several reasons. They talk about it in
24 there. One is congenital, meaning the when the
25 spine was formed it's was just more narrow than

Page 17

Page 19

1 normal, and that can actually progress as times go
2 on.

3 The second thing that could happens is
4 these joints here where the two vertebrae come
5 together can get arthritis, and bony growth around
6 them can occur, and so you can get spinal stenosis
7 coming in from this arthritis section, and, again,
8 they say it doesn't appear that Mr. Mazzamuto has
9 that.

10 So those are the two kinds of spinal
11 stenosis, and I believe this is red thing here is a
12 herniated disk that they put on there. I didn't
13 notice that was there.

14 Q Where would 3 and 4 be, which is what they
15 -- the Doctor says is the maximum?

16 A Well, the maximum is between these two
17 vertebrae, this is 1, 2, and this is 3, and then
18 this is 4. And, again, usually -- if you notice the
19 nerves emerge from the spaces between two contiguous
20 vertebral bodies. So if you have L3 here, the space
21 where the nerve comes out is L3-4, which is the
22 space in between those two, and so this is the level
23 where he sees a narrowing in the spinal canal.

24

25

1 Q Do you want to show it to the jury please?

2 A Okay. Basically it's a transverse section
3 of the spinal cord. Essentially if you took the
4 spine, put it like this, and chopped it off, so you
5 can get an end on look at the spine, you are looking
6 at the top of a vertebral body.

7 Q And does it show an example of a spinal
8 stenosis?

9 A Yeah. This is the normal spinal canal
10 here, and a stenotic canal would look something like
11 that in this particular case. It's a narrowing of
12 that canal opening.

13 Q And, Doctor, are you meaning to imply that
14 that's the exact size of Mr. Mazzamuto or is it just
15 an example of how a spinal stenosis can show
16 narrowing of what is a normal spine?

17 A This is just a general example of a spinal
18 stenosis. It is not a representation of
19 Mr. Mazzamuto's spine.

20 Q Doctor, with regard to spinal stenosis,
21 does that generally lead to back pain?

22 A It generally does when it progresses
23 beyond a certain point.

24 Q And do you have a spine diagram or
25 picture?

Page 18

Page 20

Copy of document entitled
Normal Canal and Stenotic
Canal - produced and
marked for identification

1 as Exhibit No. P-2.

2 Q Doctor, I'm showing you P-2, and can you
3 tell us what that is?

4 MR. WOLGEMUTH: Objection.

5 MR. SIMMERS: Off the video record. The
6 time is 3:38 p.m.

7 (Off the video record.)

8 MR. WOLGEMUTH: I'm going to object to
9 P-2 in addition to the previous objections that I
10 raised because, unless this is representative or an
11 actual picture of the extent of Mr. Mazzamuto's
12 stenosis, I don't think it's relevant to this
13 proceeding. I think Doctor Bower already adequately
14 described what spinal stenosis is.

15 MR. ANGINO: Go on the record.

16 MR. SIMMERS: We are back on the video
17 record. The time is 3:38 p.m.

18 (On the video record.)

19 BY MR. ANGINO:

20 Q Doctor, I'm showing you P-2. Can you tell
21 us what that is?

22 A All right. That's a picture -- a
23 transverse section.

1 A We have several.

2 Q You have several. Can you show us how
3 this leads to pain?

4 A Well, again, I'm not -- probably this
5 would be a better one to look at. Again, as -- what
6 we are looking at here, as we are looking at the
7 spine with basically these posterior elements cut
8 off so you can actually look down directly onto the
9 spinal cord as it sits in front of the vertebral
10 bodies, the spinal cord sits within this canal,
11 nerve roots emerge in between each of the spinal
12 sections. If there is a narrowing of this canal,
13 again, as we described before, this space gets
14 narrower, the canal -- or the spinal cord can
15 actually become impinged by that pressure, and
16 obviously bending of the spine can lead to
17 increasing pressure as the forces are exerted upon
18 it because of the bend and the curve in the spine.

19 So the spinal cord is what normally gets
20 impinged upon rather than the nerves roots
21 themselves. There can be narrowing of these holes
22 as well on the side, in which case the nerve endings
23 as they came out would also be impinged upon.

24 Q In addition to having back pain, can you
25 also have what we call leg pain?

1 A Yes. When you have a nerve that's
2 impinged, you can have symptoms anywhere that nerve
3 goes, and in the lower part of the back the nerve
4 roots that emerge from the spine at that point
5 eventually form the nerves, and go down the leg. So
6 you if you have compression of either the spinal
7 cord or the nerve endings as they emerge for the
8 particular nerves that form the femoral nerve and
9 other nerve, the sciatic nerve, that goes down the
10 leg, you can get pain along the entire tract of that
11 nerve, and you can also get muscle weakness because
12 nerves not only provide sensation, they also provide
13 the control for the voluntary muscles as well.
14 Q So you can get muscle weakness, you can
15 have pain. Can you get burning pain?
16 A Well, you can get any pain that you can
17 imagine. The nerves are the sensation. You know,
18 typical pains that people describe when it's
19 actually a nerve pain, which is call neuropathic
20 pain, would be burning, stinging, it can be icy
21 cold, it can be numb, you know, or as I say here,
22 jaggy.
23 Q So if somebody who has a spinal stenosis
24 complains of back pain and/or burning pain and/or
25 numbness, is that telling you as a Doctor that

1 BY MR. ANGINO:
2 Q Doctor, there is a packet of materials
3 starting with 1996 Attending Physician's
4 Statements. Do you have such a packet in front of
5 you?
6 A Yes I do.
7 Q And did that packet come from your file?
8 A This is a copy of a packet from forms that
9 were from our file, yes.
10 Q And we have marked that as P-3.
11 Copy of packet of documents
beginning with Attending
Physician's Statement for
Vincenzo Mazzamuto -
produced and marked for
identification as Exhibit
12
13
14 No. P-3.
15 Doctor, is it customary in your particular
16 profession when a person has a condition that is
17 disabling that you get paperwork from insurance
18 companies to complete?
19 A Yes, that's a very common thing.
20 Q And with Mr. Mazzamuto back in 1996, did
21 you receive material that you needed to complete
22 under the heading Attending Physician's Statement?
23 A Yes, I did.
24 Q And is the date there 10/23/96?
25 A Yes, it is.

1 there's impingement upon the spinal cord and/or the
2 nerve roots that emanate from the spinal cord?
3 A That's a sign that there's a nerve
4 impingement somewhere in the system.
5 Q And with regard to Mr. Mazzamuto, do your
6 records show that starting in the period of 1996 he
7 started to complaint of all of what we have just
8 described, back pain, radiating numbness, radiating
9 burning pain into his legs?
10 A Yes, they do.
11 Q And with regard to that, did there come a
12 time in 1996 where this pain was of such an
13 intensity that he was disabled from work?
14 MR. WOLGEMUTH: Objection.
15 MR. SIMMERS: Off the video record. The
16 time is 3:43 p.m.
17 (Off the video record.)
18 MR. WOLGEMUTH: My objection is to
19 relevance because I really don't think that
20 Mr. Mazzamuto's disability in 1996 is relevant to
21 the issues that are raised in 2000.
22 MR. ANGINO: Back on the record.
23 MR. SIMMERS: Back on the video record.
24 The time is 3:43 p.m.
25 (On the video record.)

1 Q With regard to that attending statement,
2 is that your handwriting?
3 A Yes, it is.
4 Q And with regard to the diagnosis that you
5 made back in 1996, what was it?
6 A It was number one, low back pain, and
7 number 2, central spinal stenosis.
8 Q What you have just been describing to us,
9 is that right?
10 A That is correct.
11 Q And when you go through the physician
12 statement, does the insurance company ask you
13 questions such as medications that the patient is
14 taking?
15 A Yes, they do.
16 Q And what type of medication was
17 Mr. Mazzamuto taking back in 1996?
18 A At that point he was on a medication
19 called Relafen, which is an -- what's called a
20 nonsteroidal antiinflammatory medication. It helps
21 with both inflammation and pain, usually helps with
22 an arthritic and bony conditions. He was also on
23 Gabapentin, which goes by the brand name of
24 Neurontin, which is actually a seizure medication,
25 but is now used commonly as an adjunct to pain,

<p style="text-align: right;">Page 25</p> <p>1 especially neuropathic pain, pain that comes from 2 nerve injury or compression. 3 Q Were you asked when his symptoms first 4 appeared, and did you supply dates for them? 5 A Yes, I did. 6 Q And what did you indicate as far as when 7 his symptoms first appeared? 8 A That they first appeared for this episode 9 in January of 1996, and then again in March of 1996. 10 Q And is there a place for you to complete 11 where it says when patient first consulted you? 12 A Yes, and that was April of 1996 when he 13 came in with those complaints. 14 Q And is there another point where it says 15 has patient ever had same or similar conditions? 16 A Yes, there was. 17 Q And what did you mark for that? 18 A I wrote that, when I had reviewed the 19 record, he had been seen for low back discomfort in 20 1992, and it had subsequently resolved. 21 Q And is there a question as to whether the 22 patient was still under your care for the condition 23 -- the back condition? 24 A Yes. 25 Q And did you mark that with a yes?</p>	<p style="text-align: right;">Page 27</p> <p>1 and in some people standing bothers them, in some 2 people bending bothers them, and in some people both 3 of them bother -- you know, both positions can 4 bother people. 5 Q Was there a question No. 13 where they 6 asked if Mr. Mazzamuto was continuously totally 7 disabled? 8 A Yes, there was. 9 Q And did you find that he had been 10 continuously totally disabled? 11 A I did. 12 Q From what period to what period? 13 A From April 3 of 1996 to October 23 of 14 1996. 15 Q And is there a second page to that -- 16 actually not a second page, but did you likewise 17 complete another one on 11/18/96? 18 A Yes, I did. 19 Q And with regard to that Attending 20 Physician's Statement of Disability, was your 21 diagnosis the same, low back pain, central spinal 22 stenosis? 23 A Yes, it was. 24 Q And was there a question 3 where it said 25 what are the subjective and object -- subjective</p>
<p style="text-align: right;">Page 26</p> <p>1 A Yes, I did. 2 Q And did you mark the date that he was last 3 treated? 4 A Yes. As of that form it was as of October 5 23, 1996. 6 Q Is there question No. 10 that asks about 7 restrictions or limitations? 8 A Yes, there is. 9 Q And what was your restriction or 10 limitation? 11 A At that time it was just no prolonged 12 standing. 13 Q So that as far as your medical opinion at 14 that time you felt he shouldn't stand for long 15 periods, is that right? 16 A Correct. 17 Q And what happens to someone with this type 18 of condition, this stenosis, when a person stands? 19 A Well, depending upon your posture, when 20 you stand, you can actually have, again, as you 21 straighten the spine out, standing upright can 22 sometimes cause further compression. Now, depending 23 upon what the actual extent of the stenosis is, and 24 what the actual orientation when you would look at 25 it, different postures may affect it differently,</p>	<p style="text-align: right;">Page 28</p> <p>1 symptoms and objective findings, and what did you 2 answer? 3 A I answered that there was. He had low 4 back pain, intermittent numbness of both lower 5 extremities as the subjective of the symptoms, 6 meaning the symptoms that the patient themselves 7 report, and objective symptoms, which are things 8 that are demonstrated on the physical examination or 9 on tests, is that he diminished strength in both 10 legs, and that he had had an MRI which documented 11 the central spinal stenosis. 12 Q So that before when I was asking you 13 general questions, he had the pain, he had the 14 numbness, and he had the weakness, is that right? 15 A That is correct. 16 Q So all the signs that one finds with nerve 17 impingement he was demonstrating as long ago as 18 1996, is that right? 19 A That is correct. 20 Q And in terms of treatment and progress, 21 did you note on the record when you treated him, and 22 did you note under progress that he had improved? 23 A Yes, I did. 24 Q And when they ask you about the extent of 25 his disability, did you say that he was no longer</p>

Page 29	Page 31
<p>1 disabled? Is that what it is?</p> <p>2 A That as of October 23 he was no longer</p> <p>3 disabled, correct.</p> <p>4 Q So this was a period of total disability</p> <p>5 that had gone from the period that you had</p> <p>6 indicated, which was April through October, is that</p> <p>7 right?</p> <p>8 A That is correct.</p> <p>9 Q The next particular document that you have</p> <p>10 there as a part of this packet of material is it a</p> <p>11 letter dated November 3 of 2000?</p> <p>12 A Yes, it is.</p> <p>13 Q So that there's a gap of time of four</p> <p>14 years, and during that four year period of time had</p> <p>15 Mr. Mazzamuto returned to his work?</p> <p>16 A Yes, he had.</p> <p>17 Q Did he continue, however, to have back</p> <p>18 pain, and did he continue to obtain injections for</p> <p>19 that back discomfort?</p> <p>20 A Yes, he did.</p> <p>21 Q So that with something such as this spinal</p> <p>22 stenosis it doesn't go away, is that right?</p> <p>23 A The spinal stenosis itself does not go</p> <p>24 away.</p> <p>25 Q And although there may be improvements at</p>	<p>1 A Yes, it was.</p> <p>2 Q And did you -- would you read the first</p> <p>3 paragraph please?</p> <p>4 A Dear Sir or Madam.</p> <p>5 I'm writing this letter to clarify the</p> <p>6 medical facts of my patient, Vincenzo Mazzamuto, who</p> <p>7 apparently has policies with your companies. I find</p> <p>8 it difficult to coherently fill out the forms on his</p> <p>9 medical-- since -- as his medical problems are</p> <p>10 several, some of which are long-standing and do not</p> <p>11 easily fit into the category such as when did</p> <p>12 symptoms appear. Mr. Mazzamuto has had a long</p> <p>13 history of low back pain, and, in fact, for many</p> <p>14 years has undergone numerous treatments and physical</p> <p>15 therapy, and an MRI in the past did reveal central</p> <p>16 spinal stenosis, which gradually worsened to a</p> <p>17 maximum at the L3-L4 level and extends from L2 to</p> <p>18 L5. This has given him periodic problems with lower</p> <p>19 back discomfort, symptoms of radiculopathy, and</p> <p>20 urinary irritability.</p> <p>21 Q Can you tell us what radiculopathy is?</p> <p>22 A Radiculopathy is another term that a nerve</p> <p>23 going down -- down a limb is being affected.</p> <p>24 Q And what about urinary irritability?</p> <p>25 A Urinary irritability he was seen for</p>
Page 30	Page 32
<p>1 times, what is the progression of stenosis over</p> <p>2 time?</p> <p>3 A Generally the stenosis gets worse over</p> <p>4 time with aging.</p> <p>5 Q And was that the case with Mr. Mazzamuto?</p> <p>6 A That is the case.</p> <p>7 Q And in the year 2000 on July 22 did</p> <p>8 Mr. Mazzamuto have a heart attack?</p> <p>9 A Yes, he did.</p> <p>10 Q And following that heart attack did he</p> <p>11 have, again, problems with his back?</p> <p>12 A Yes, he did.</p> <p>13 Q And in addition to having the heart attack</p> <p>14 and problems with his back, did he develop emotional</p> <p>15 problems?</p> <p>16 A Yes, he did. He developed severe anxiety.</p> <p>17 Q And as had occurred in 1996, were you</p> <p>18 requested to supply information from his disability</p> <p>19 insurance carrier as to his condition?</p> <p>20 A Yes, I was.</p> <p>21 Q And did you do that by way of letter dated</p> <p>22 November 3, 2000?</p> <p>23 A Yes, I did.</p> <p>24 Q And was that letter addressed to Paul</p> <p>25 Revere and New York Life Insurance Company?</p>	<p>1 several occasions because of the sensation that he</p> <p>2 couldn't empty his bladder completely, and had to go</p> <p>3 frequently.</p> <p>4 Q Continue with the paragraph please.</p> <p>5 A Prolonged standing and heavy lifting has</p> <p>6 aggravated it. He has been seen in physical</p> <p>7 therapy, treated in a local pain clinic with local</p> <p>8 injections, as well as prescription analgesics,</p> <p>9 nonsteroidal antiinflammatory agents, and other</p> <p>10 atypical chronic pain medications.</p> <p>11 Q And did you mention then in the second</p> <p>12 full paragraph the complication of the heart attack?</p> <p>13 A Yes, I did.</p> <p>14 Q And you described what occurred there?</p> <p>15 A I did.</p> <p>16 Q And with the third paragraph did you talk</p> <p>17 about a readmission to the hospital with chest pain?</p> <p>18 A Yes, I did.</p> <p>19 Q And then would you read the fourth full</p> <p>20 paragraph please?</p> <p>21 A As the patient has attempted to return to</p> <p>22 work after his recovery from his heart attack, his</p> <p>23 back worsened again. Also the stress and anxiety</p> <p>24 which has been provoked because of his recent</p> <p>25 cardiac problems, and manifested themselves with</p>

Page 33

1 significant anxiety when he is back in a work
 2 situation.
 3 Q Can you read the next paragraph please?
 4 A Sure. While his heart condition has
 5 currently stabilized, and should hopefully not pose
 6 a great limitation to him in the future (assuming
 7 ongoing risk factor modification is successful, such
 8 as smoking cessation, cholesterol lowering, et
 9 cetera), the amount of weight he has gained from his
 10 smoking cessation has re-exacerbated his chronic
 11 and progressive back problem. At the present time
 12 he is not able to do the work required in running
 13 his restaurant because he cannot stand for long
 14 periods of time, has difficulty bending, and is
 15 restricted from heavy lifting. It is unlikely he
 16 will be able to return to work in the foreseeable
 17 future.
 18 Q And then were you asked for a prognosis?
 19 A Yes, I was.
 20 Q And what did you say?
 21 A His prognosis for recovery is fair over
 22 the next six to twelve months.
 23 Q How about the next paragraph?
 24 A On his last visit of October 4 he weighed
 25 206 pounds, his blood pressure was 112 over 80, his

Page 34

1 pulse was 48 and regular. He was proceeding with
 2 his cardiac rehabilitation program and was to
 3 follow-up at the pain clinic for further symptomatic
 4 treatment of his back. At the present time the
 5 patient has not achieved a medical plateau. It is
 6 my hope that once his weight stabilizes after his
 7 smoking cessation -- after his smoking cessation is
 8 consolidated, and he has completed his cardiac
 9 rehabilitation, he may be able to attempt weight
 10 loss, and hopefully improve his back situation in
 11 the future.
 12 Q And the next paragraph?
 13 A The final results of this may not be
 14 evident, however, for the next six months.
 15 Q In addition to sending a letter on
 16 November 2, were you asked to complete a form, which
 17 is the next part of the packet, which carries the
 18 date of November 15, 2000?
 19 A Yes, I did.
 20 Q And is it in a similar form to the other
 21 form that you had completed back in 1996?
 22 A Yes, it is.
 23 Q And with regard to that particular form,
 24 did you state that he continued to be totally
 25 disabled?

Page 35

1 A Yes, I did.
 2 Q As to paragraph 16, did you indicate what
 3 his current restrictions were?
 4 A Yes, I did.
 5 Q And what were they?
 6 A Cannot be in stressful situations, no
 7 prolonged standing, no lifting.
 8 Q Doctor, the next page is that, again,
 9 another form that you completed?
 10 A Yes, it is.
 11 Q And with regard to these forms, do you
 12 routinely get them either monthly or bimonthly, and
 13 do you complete them, and send them back to the
 14 insurance company?
 15 A Different companies seem to have different
 16 intervals at which they require them but, yes, we
 17 get them repeatedly to sort of keep up with the
 18 ongoing situation, and we fill them out and send
 19 them back.
 20 Q As the years went by since the year 2000,
 21 has Mr. Mazzamuto's condition worsened?
 22 A His back situation has worsened.
 23 Copy of document entitled
 Fig. 2: Posture typical of
 a patient with Spinal
 Stenosis - produced and
 24
 25

Page 36

marked for identification
 as Exhibit No. P-4.

1
 2
 3 Q And with regard to the worsening of his
 4 back condition, has he started to developed more of
 5 what we call a stoop, and I'm showing you another
 6 exhibit?
 7 MR. WOLGEMUTH: Objection.
 8 MR. SIMMERS: Off the video record. The
 9 time is 3:57 p.m.
 10 (Off the video record.)
 11 MR. WOLGEMUTH: Again, I think this
 12 picture is not representative of Mr. Mazzamuto's
 13 posture. I don't think it's relevant to his
 14 testimony, and I think it's inflammatory.
 15 MR. ANGINO: Back on the record.
 16 MR. SIMMERS: Back on the video record.
 17 The time is 3:57 p.m.
 18 (On the video record.)
 19 BY MR. ANGINO:
 20 Q Can you hold the picture up, Doctor, and
 21 tell us, although Mr. Mazzamuto is not as pronounced
 22 yet as this particular individual, has he through
 23 the past three years begun do develop more and more
 24 of a stoop?
 25 A He does have a stooped posture.

Page 37

Page 39

1 Q What causes a stoop in posture, Doctor?

2 A Well, usually, again, as I had mentioned
3 earlier, depending upon the exact anatomy of the
4 stenosis, people are going to try to find the most
5 comfortable position to relieve the pressure on the
6 spinal cord or the impinging nerve, and usually by
7 curving forward slightly you can relieve some of
8 that pressure to a point.

9 Q Doctor, approximately a year ago were you
10 requested to provide an update of Mr. Mazzamuto's
11 condition, and did you do that by way of letter of
12 April 16, 2002?

13 A Yes, I did.

14 Q And I'm marking this as P-4?

15 MR. WOLGEMUTH: P-5.

16 MR. ANGINO: P-5.

17 Copy of letter dated April
16, 2000 to Mrs. Trudy
McGraw, The Wellington,
18 from Douglas J. Bower, M.D.
19 - produced and marked for
identification as Exhibit

20 No. P-5.

21 BY MR. ANGINO:

22 Q Do you have that in front of you, Doctor?

23 A Yes, I do.

24 Q Doctor, perhaps if you would start with
25 the second full paragraph, and it's a short letter,

1 problem, which is that of coronary artery disease.

2 As a result of his heart problems, Mr. Mazzamuto is
3 extremely fearful of suffering a heart attack and
4 dying.

5 At the present time I feel that
6 Mr. Mazzamuto is beings treated maximally, but the
7 combination of the three previously mentioned
8 conditions still renders him unable to work.
9 Because of his severe anxiety, he is unable to even
10 consider the possibility of back surgery, and he's
11 extremely fearful that surgery will either render
12 him paralyzed or induce further myocardial
13 infarction. As such, I do not think it wise to
14 pursue this option. We will continue our efforts
15 with medical therapy in an effort to improve
16 Mr. Mazzamuto's quality of life, but I feel that we
17 have probably plateaued in our abilities to improve
18 his level of function. As such, it has been our
19 recommendation that he not return to work.

20 Q Doctor, with regard to Mr. Mazzamuto, he's
21 been your patient now for almost ten years, do you
22 know the type of work he does?

23 A Yes, I do.

24 Q What type of work does he do?

25 A He is self-employed. He owns and runs a

Page 38

Page 40

1 read it to us please?

2 A Okay. As I mentioned to you in past
3 correspondence, Mr. Mazzamuto has three primary
4 medical conditions. His first problem revolves
5 around his severe low back pain, which has been
6 chronic and unrelenting despite numerous aggressive
7 interventions. He has been on multiple medications,
8 received therapy from a pain clinic, received local
9 epidural steroid injections, and numerous
10 prescription medications, all with only partial
11 success. Despite this aggressive therapy,
12 Mr. Mazzamuto is still severely limited in his
13 ability to stand, bend, sit for long periods of
14 time, and is unable to work.

15 His second, and perhaps most severe
16 problem, is that of chronic anxiety and depression.
17 This has become especially manifest over the last
18 several years, and has proved to be somewhat
19 refractory to multiple medications -- medical
20 interventions.

21 Q What is refractory?

22 A Refractory means not responding to
23 treatment.

24 Q Continue please.

25 A This problem was complicated by his third

1 restaurant.

2 Q And, Doctor, are you aware from actually
3 going to his restaurant ten to fifteen times the
4 type of work he does?

5 A Yes, I am.

6 Q Did I supply you a copy of a video which
7 shows the type of work he does?

8 A Yes, you did.

9 Q Doctor, has Mr. Mazzamuto and
10 Mrs. Mazzamuto also explained to you at different
11 times what he does?

12 A Yes, they have.

13 Q Can you tell us what are the things that
14 you have observed or things that you are aware of
15 that make his current condition, the three things
16 that he has, the emotional condition, the back
17 condition, and the heart condition, such that he is
18 unable to work?

19 A Okay. Well, first, and to keep it simple,
20 the heart condition at this point is probably not
21 relevant, and probably does not contribute at this
22 point to his disability or in his inability to work,
23 so we will focus on the other two conditions.

24 As regards to his back condition, he runs
25 a basically pizza and sub restaurant. You know,

Page 41

Page 43

1 there's a counter that you stand at when you order.
 2 The food is prepared in a standing position.
 3 There's various stations. There's places where you
 4 make pizza, places where you make hot food, places
 5 where you make subs. It all requires frequent
 6 bending, stooping, prolonged standing. Supplies are
 7 kept overhead, supplies are kept, you know,
 8 underneath. So you are either reaching forward to
 9 grab things or you are reaching underneath cupboards
 10 and cabinets to grab things.

11 You know, as a restaurant, most materials
 12 that arrive arrive in bulk. You know, these are big
 13 jars of things. There are cases of materials. You
 14 know, large cans of various commercial grade food
 15 items.

16 So all of those things are basically the
 17 antithesis of what Mr. Mazzamuto is currently able
 18 to do. He can't stand for prolong periods of time.
 19 He can't do a lot of bending. He can't do a lot of
 20 lending forward. You know, he cannot do lifting of
 21 heavy objects or, you know, putting away heavy
 22 objects in storage containers or storerooms, you
 23 know, things of that nature.

24 Q Approximately how long could he stand
 25 before he would start to get pain?

Page 42

Page 44

1 A Well, based on my conversations with him,
 2 I think he can normally stand in a particular
 3 position maybe ten or fifteen minutes before he
 4 needs to change position, and, you know, the thing
 5 with that is it's almost a constant need to change
 6 positions. He might sit for a period of time, and
 7 then need to stand. He might stand for a period of
 8 time, and then need to sit. He might sit, and then
 9 need to lie down. And so people are constantly
 10 shifting position in an effort to try to find some
 11 point of maximum relief.

12 Q And, Doctor, the counter that he stands
 13 behind is it about four feet tall?

14 A Four, maybe slightly higher. Yeah, about
 15 that.

16 Q So it wouldn't be very practical to sit
 17 there, and to wait on customers, is that right?

18 A No, you probably really couldn't sit
 19 there, you would be down below the counter level.

20 Q Additionally, there's not much space
 21 there, is there?

22 A It's a small restaurant, and the work
 23 spaces are quite tight and cramped, and there are
 24 several people all doing things simultaneously
 25 there.

1 Q From your observation particular of the
 2 video, does it seem to be a fast paced kind of
 3 place?

4 A Especially during, you know, the peak
 5 hours of a restaurant, you know, the lunch rush, the
 6 dinner rush. There's lots of activity, and a lot of
 7 people doing lots of things all simultaneously, and
 8 the pace of the work of each of the workers is quite
 9 brisk.

10 Q What about the emotional element? I think
 11 you indicated he also has emotional problems,
 12 depression, things such as that?

13 A Well, when he first attempted to go back
 14 to work, again, as a small business owner, my
 15 observation is that you would sort of have to be
 16 involved in all aspects, and he has family members,
 17 but he also has employees who work at the
 18 restaurant. His past habit had been that if
 19 something needed to be done, and nobody was doing
 20 it, he could jump in and do it. When he was no
 21 longer able to do that, he would get extremely
 22 frustrated, he would get angry, he would lose his
 23 temper, and that sort of emotional stress would lead
 24 to things such as chest discomfort, which
 25 fortunately is only his heart, but just a

1 manifestation of the stress. It's also promoted him
 2 to take back the habit of smoking, which, again, is
 3 further damaging to his health down the line. So
 4 being in the restaurant when he really couldn't
 5 contribute to anything turned out to be something
 6 that aggravated his emotional stress and his anxiety
 7 levels.

8 Q Did it even get to a point where he
 9 started to have problems outside the restaurant with
 10 his wife because of the emotional --

11 A He ended up with lots of problems both at
 12 the restaurant and with his wife. He was irritable,
 13 he was grouchy, he would snap at her. He was having
 14 lots of difficulty focusing, lots of difficulty
 15 concentrating, and, as such, much of the work that
 16 he normally would do with the bookkeeping, the
 17 paperwork, things like that, I think fell to his
 18 wife to pick up the slack, and, you know, the fact
 19 that he wasn't doing that made him feel guilty, but
 20 at the same time he really wasn't capable of doing
 21 it.

22 Q Would you say that Mr. Mazzamuto is a
 23 relatively short man?

24 A He is a short man.

25 Q What would you estimate his height, maybe

Page 45

1 if you have it?
 2 A I don't have it here. We don't do a good
 3 job with measuring people. I would say he's
 4 probably about 5-6, but I don't think I have it.
 5 Q So 5-6, and at one point I think you said
 6 he weighed like 206 pounds or something?
 7 A He did.
 8 Q And I assume that's what we call obese?
 9 A That is medical obesity, and he's heavier
 10 now.
 11 Q Even heavier now?
 12 A He is.
 13 Q So that when somebody has a stenosis, and
 14 one has pain, and one then doesn't do much, the
 15 tendency I guess is to put on weight, is that right?
 16 A Well, that's true, and, again, if one is
 17 not working, and is at home, and is anxious, some
 18 people will deal with anxiety by not eating, and
 19 some people deal with it by eating, and if you don't
 20 have much else to do, and you eat, and you don't
 21 have any physical activity, you gain weight.
 22 Q And what effect does this additional
 23 weight then have upon the back?
 24 A Well, the weight obviously adds more
 25 strain to the back. The weight is, you know, in the

Page 46

1 front in the belly, and it pulls everything forward,
 2 and puts more torque and more strain on the spine.
 3 The spine has to support the weight, and, again, it
 4 further aggravates the back pain.
 5 Q So that it's almost like a never ending
 6 process, you have got the back condition, you don't
 7 do things, you get heavier, more aggravation on the
 8 back?
 9 A Do less, get heavier, and it spirals.
 10 Q Doctor, if that column gets narrow enough
 11 around the spinal cord, can it actually lead to what
 12 we call paralysis?
 13 A It could --
 14 MR. WOLGEMUTH: Objection.
 15 MR. SIMMERS: Off the video record. The
 16 time is 4:07 p.m.
 17 (Off the video record.)
 18 MR. WOLGEMUTH: You are asking the Doctor
 19 for a speculate opinion that has no applicability to
 20 Mr. Mazzamuto.
 21 MR. ANGINO: Well, no, it's not
 22 speculative. All the books say that it can lead to
 23 paralysis and certain conditions. So all I asked
 24 was his opinion if it can, and I'm not -- with
 25 regard to the future, the law is clear, he doesn't

Page 47

1 have to say, you know, that it's going to happen or
 2 probably will happen, but it can. Just like, you
 3 know, if you have a head injury, you can have a
 4 seizure, you know, if you would wind with certain
 5 things, doesn't mean you are going to. So that was
 6 the direction of my question.
 7 MR. WOLGEMUTH: Well, my objection is on
 8 the record.
 9 MR. ANGINO: Okay.
 10 MR. SIMMERS: We are back on the video
 11 record. The time is 4:08 p.m.
 12 (On the video record.)
 13 BY MR. ANGINO:
 14 Q Doctor, I'm not meaning to imply that
 15 paralysis is a common thing that can occur with the
 16 stenosis, but can it happen?
 17 A It can happen.
 18 Q Doctor, with regard to Mr. Mazzamuto, with
 19 your background as his private physician over a
 20 period of almost nine years, and having treated him
 21 from the time that his back condition developed
 22 which resulted in his earlier disability, and the
 23 period of time from that earlier disability to the
 24 disability that followed in 2000, Doctor, do you
 25 have an opinion based upon reasonable medical

Page 48

1 certainty as to whether Mr. Mazzamuto is totally and
 2 continuously disabled from doing the type of work
 3 that he did, which is to own and operate a pizza
 4 restaurant?
 5 A Yeah, I feel that he is totally and
 6 permanently disabled from the kind of work he has
 7 previously done.
 8 MR. ANGINO: You may cross examine.
 9 MR. WOLGEMUTH: What exhibit number are we
 10 at, 6?
 11 MRS. STILL: I believe, yes.
 12 MR. WOLGEMUTH: Doctor, I'm going to give
 13 you a packet of documents, which are your notes.
 14 I'm just going to mark them as 6 before we start, so
 15 I don't have to do that later.
 16 MR. ANGINO: You might want to mark it
 17 D-1 because I have been marking them for use at
 18 trial. So we would call this as D-1.
 19 MR. WOLGEMUTH: Okay. That's fine.
 20 Copy of packet of documents
 21 beginning with Office Note
 22 for Vincent Mazzamuto dated
 23 9/18/02 - produced and
 24 marked for identification as
 25 Exhibit D-1.
 26 MR. WOLGEMUTH: I'm not going to refer to
 27 them quite yet.

Page 49

Page 51

1 THE WITNESS: Okay.
2 CROSS EXAMINATION
3 BY MR. WOLGEMUTH:
4 Q Now, Doctor, you had testified that you
5 are board certified in internal medicine, correct?
6 A That is correct.
7 Q Okay. And you agree with me that you are
8 not board certified in psychiatry?
9 A I am not.
10 Q Do you even know what the requirements are
11 for board certification in psychiatry?
12 A I assume it's completing a psychiatric
13 residency, and passing a standardized board
14 examination.
15 Q Okay. And you agree with me that you are
16 not board certified in orthopedic surgery?
17 A I am not board certified in orthopedic or
18 neurosurgery for that matter.
19 Q Okay. And you are not board certified in
20 psychiatry?
21 A I am not.
22 Q Okay. What is psychiatry?
23 A Psychiatry is rehabilitation medicine.
24 Doctors who do -- you know, work at rehabilitation
25 hospitals, work with injured patients, work with

1 would have been all the records that you had?
2 A Correct.
3 Q And the records that you provided include
4 your progress notes or your office notes?
5 A That's correct.
6 Q Doctor, would you agree with me that, as a
7 physician, it's very important to include any
8 significant condition in your office notes?
9 A Well, it depends on the nature of the
10 visit. You know, when Mr. Mazzamuto comes to see
11 me, he doesn't necessary come to see me on every
12 visit with the, you know, express purpose of talking
13 about his back pain or, you know, there are routine
14 physical examinations, there are, you know, acute
15 illnesses, and not every medical condition of that
16 patient is covered and documented with every exam,
17 no, that's not -- we don't have that much time.
18 Q Okay. But you would agree with me,
19 Doctor, that if Mr. Mazzamuto came in, and was
20 complaining about back pain, most likely it would
21 have been significant enough that you would have
22 recorded it in that days' office visit notes?
23 A If that's what we were dealing with, yeah.
24 Q Or, similarly, if he had come in and
25 complained about some type of anxiety problem or

Page 50

Page 52

1 people post-surgery like the Mechanicsburg South
2 Rehabilitation unit, things such as that matter.
3 Q Okay. And neurology or a neurosurgeon
4 that would be somebody that operates on the back?
5 A Neurologists are medical physicians who
6 diagnose neurologic diseases. Neurosurgeons operate
7 on nervous structure, which includes both back and
8 brain.
9 Q Okay. Now, Doctor, would you agree with
10 me that you are not an expert in orthopedic
11 conditions?
12 A I am not an expert in all orthopedic
13 conditions, that's correct.
14 Q And would you also agree with me that you
15 are not an expert in psychiatric conditions?
16 A I'm not an expert in psychiatric
17 conditions.
18 Q Now, Doctor, you had previously provided
19 medical records to Mr. Angino in response to a
20 request that he had for Mr. Mazzamuto's records, and
21 I think you even provided us with medical records
22 pursuant to subpoena. Do you recall that?
23 A I have provided many records. I assume
24 that's correct.
25 Q And the records that you provided to us

1 depression problem, and discussed it with you, you
2 would have included it in your office notes for that
3 visit?
4 A I would think so, yeah.
5 Q And you would agree with me that -- excuse
6 me -- that something that would prevent somebody
7 from working would be a significant condition or
8 something that you most likely would include in your
9 office notes?
10 A I would include it, but if it's been an
11 ongoing condition for a period of a long time every
12 office visit is not necessarily focused upon his
13 disability or lack of disability. So if it was a
14 brand new issue, we might spend a lot more time with
15 it, but if it's an old thing that really hasn't
16 changed, we might not. You know, again, we have
17 quite tight schedules, and trying to deal with each
18 problem with each visit isn't always possible, and,
19 again, the documentation hopefully addresses the
20 main points of that particular visit, again,
21 primarily for the purpose of, you know, keeping
22 track of his medical conditions and treatment, not
23 necessarily for supporting insurance claims or
24 disability claims.
25 Q Okay. But if it's something that was

Page 53

1 significant and something that you discussed, most
 2 likely it have ended up in your notes?
 3 A It would have been in the notes in some
 4 form, sure.
 5 Q All right. And, Doctor, do you agree with
 6 me that it's important to include the treatment that
 7 you are rendering in your office notes?
 8 A Sure.
 9 Q And do you agree that you include -- or
 10 it's important to include the treatment that you are
 11 rendering because other physicians might actually be
 12 reviewing your notes, and rendering treatment based
 13 upon your office notes?
 14 A Sure.
 15 Q And, similarly, you would agree that it's
 16 important to include any medications that you are
 17 prescribing in your office notes?
 18 A They are in the notes or the medication
 19 flow sheet, yeah. They should be there in some
 20 form.
 21 Q And, again, that's for your own benefit,
 22 and for the benefit of other treating physicians --
 23 A Right.
 24 Q -- who might be using those notes?
 25 Doctor, would you agree that it's

Page 54

1 important to include things like therapy, individual
 2 or group therapy, in your notes if Mr. Mazzamuto was
 3 receiving it or if you had prescribed it?
 4 A What are you talking psychiatric therapy
 5 or what? I'm not sure what therapy you are
 6 referring to.
 7 Q Well, it would be a number. Psychiatric
 8 therapy, if you had prescribed psychiatric therapy,
 9 would you include that fact in your office notes?
 10 A You mean medication?
 11 Q No. In addition to medication. I'm
 12 talking about, you know, counseling --
 13 A See a psychiatrist?
 14 Q Seeing a psychiatrist?
 15 A Correct.
 16 Q You would include that in your office
 17 notes?
 18 A Yes, I would.
 19 Q Okay. And if you had recommended therapy
 20 such as physical therapy -- in fact, I think you do
 21 reference physical therapy in your notes frequently?
 22 A Right.
 23 Q And, Doctor, would you agree that if your
 24 office notes are incomplete that Mr. Mazzamuto may
 25 not get the proper treatment from other physicians?

Page 55

1 A Any physicians I guess who had or were
 2 reviewing those notes, correct.
 3 Q And generally, Doctor, would you agree
 4 that when Mr. Mazzamuto relays symptoms or gives you
 5 information, describes his condition, that you would
 6 include that, and you would include it accurately in
 7 your notes?
 8 A I would probably make sure it is included
 9 accurately, though if it was repetitious from a past
 10 visit, I may not reiterate the same facts with every
 11 visit in every note.
 12 Q Now, Doctor, do you know what a global
 13 assessment of functioning is or a GAF?
 14 A I have heard of it.
 15 Q Do you agree that it's a tool to evaluate
 16 and rate a patient's overall psychological
 17 functioning?
 18 A Yes.
 19 Q Doctor, do you agree that the GAF scale is
 20 a scale from 1 to 100 based upon the individual's
 21 psychological, social, and occupational functioning?
 22 A I don't know have knowledge of whether
 23 it's a scale from 1 to 10 or 1 to 100. I don't know
 24 that.
 25 Q Well, did you agree that such a test as a

Page 56

1 GAF would be helpful in diagnosing and treating a
 2 patient with psychiatric conditions?
 3 A I think if you were screening people, and
 4 you weren't sure if they were depressed or anxious,
 5 it might be another tool you could use.
 6 Q So, Doctor, since you don't really know
 7 what a GAF score is or the scale is, you wouldn't
 8 really be able to understand what a GAF score of say
 9 31 to 40 would represent?
 10 A Well, I would assume it would be someone
 11 who's significantly depressed and nonfunctional.
 12 There are many -- there are many depression --
 13 there's a depression index. There are many tools
 14 one can use to screen a population for depression if
 15 you think the diagnosis is in doubt.
 16 Q Doctor, do you agree with me that nowhere
 17 in your office notes do you have a reflected GAF
 18 score for Mr. Mazzamuto?
 19 A I certainly agree with that since I don't
 20 use it.
 21 Q Now, Doctor, would you agree that certain
 22 types of medical tests or procedures or examinations
 23 are done to help evaluate a patient's complaints?
 24 A Yes, I agree with that.
 25 Q And do you agree that the medical tests

Page 57	Page 59
<p>1 are used to find the cause of an individual's</p> <p>2 problems or complaints?</p> <p>3 A I think medical tests are used to diagnose</p> <p>4 medical complaints when the cause is not evident,</p> <p>5 sure.</p> <p>6 Q And that medical tests are used to help a</p> <p>7 physician prescribe treatment for someone's</p> <p>8 complaints?</p> <p>9 A In some cases, sure.</p> <p>10 Q And sometimes medical tests reveal that</p> <p>11 there's no problem after all?</p> <p>12 A Sometimes they do.</p> <p>13 Q And in this -- and, Doctor, sometimes the</p> <p>14 medical tests reveal that the condition can be</p> <p>15 treated or even cured?</p> <p>16 A Well, I think sometimes medical tests,</p> <p>17 sure, show that something can be treated. You know,</p> <p>18 the cure thing is -- I mean, that's really an open</p> <p>19 question to think about what you talking about. So</p> <p>20 I will say yes, I agree with the fact that it shows</p> <p>21 that there may be an alternate treatment.</p> <p>22 Q And, Doctor, would you agree that the use</p> <p>23 -- or without the use of medical tests that you may</p> <p>24 be left to reply upon or accept the patient's</p> <p>25 subjective complaints?</p>	<p>1 A Yes.</p> <p>2 Q Whether they are having hallucinations?</p> <p>3 A Correct.</p> <p>4 Q Thought processes?</p> <p>5 A Uh huh (yes).</p> <p>6 Q Extreme of thought?</p> <p>7 A Uh huh (yes).</p> <p>8 Q Thought content?</p> <p>9 A Yes.</p> <p>10 Q Whether they have abstract thinking?</p> <p>11 A Yep.</p> <p>12 Q The ability to concentrate?</p> <p>13 A Uh huh (yes).</p> <p>14 Q Their orientation?</p> <p>15 A Uh huh (yes).</p> <p>16 Q Their memory?</p> <p>17 A Yep.</p> <p>18 Q Their judgment?</p> <p>19 A Correct.</p> <p>20 Q Their insight?</p> <p>21 A Uh huh (yes).</p> <p>22 Q And their reliability?</p> <p>23 A That's correct.</p> <p>24 Q Now, Doctor, would you agree that it would</p> <p>25 be important to perform a mental status exam before</p>
Page 58	Page 60
<p>1 A I think that happens all the time.</p> <p>2 Q And in this case you acknowledge that you</p> <p>3 didn't request a GAF score for Mr. Mazzamuto?</p> <p>4 A That is true.</p> <p>5 Q Doctor, would you agree that a mental</p> <p>6 status exam is another tool used to evaluate a</p> <p>7 patient's overall psychological function?</p> <p>8 A It's used to evaluate people mainly when</p> <p>9 they are having periods of confusion trying to</p> <p>10 especially rule out things such a dementing process</p> <p>11 like Alzheimer's disease.</p> <p>12 Q And, Doctor, the things that you would</p> <p>13 look at in a mental status exam, do you agree that</p> <p>14 one of the things you would access is the person's</p> <p>15 appearance?</p> <p>16 A Yes.</p> <p>17 Q Motor behavior?</p> <p>18 A Huh uh (yes).</p> <p>19 Q Speech?</p> <p>20 A Uh huh (yes).</p> <p>21 Q Attitude?</p> <p>22 A Uh huh (yes).</p> <p>23 Q Mood?</p> <p>24 A Sure.</p> <p>25 Q Affective expression?</p>	<p>1 treating an individual with a psychiatric condition?</p> <p>2 A Not necessarily, no.</p> <p>3 Q And why is that?</p> <p>4 A Because, again, depending upon what the</p> <p>5 symptoms are that they are presenting with, you</p> <p>6 know, whether they come in feeling anxious, if they</p> <p>7 come in expressing thoughts of fear, sadness. That,</p> <p>8 again, if they don't come in with complaints or</p> <p>9 family members of hallucinations or confusion,</p> <p>10 depression is a very common problem, and again, you</p> <p>11 get information that you think you need, but you</p> <p>12 don't have to get every test on every patient just</p> <p>13 because it's a test that pertains to that particular</p> <p>14 medical condition. So no, I don't think it's</p> <p>15 required to do a mini mental status exam or a full</p> <p>16 mental status exam on every patient that you are</p> <p>17 going to consider putting on anxiety or</p> <p>18 antidepressant medications. No.</p> <p>19 Q Fair enough, Doctor, but do you agree with</p> <p>20 me that of those fifteen or twenty items in the</p> <p>21 mental status exam that maybe four or five of them</p> <p>22 are appropriate to examine in determining whether</p> <p>23 somebody is depressed or anxious?</p> <p>24 A I think they are important. Again, I</p> <p>25 think that they can also be obtained at times from</p>

<p style="text-align: right;">Page 61</p> <p>1 just interacting with the patient, from having 2 normal conversations with them, and from, you know, 3 sort of having an ongoing relationship with them 4 that some of those information can also be obtained 5 that way as well. 6 Q And would you agree, Doctor, that some of 7 the things that you might be looking at would be the 8 person's mood? 9 A Uh huh (yes). 10 Q And their affective expression? 11 A Yes. 12 Q Their motor behavior? 13 A Well, motor behavior I guess in a way has 14 to do with more of a neurologic assessment, but 15 sure. 16 Q Their speech? 17 A More of -- yeah, what their gait, their 18 record of -- excuse me -- their gait -- or their 19 pace of speech, and whether it's fluent or whether 20 it makes any sense at all. 21 Q And finally their thought content? 22 A Uh huh (yes). 23 Q Doctor, do you agree that nowhere in your 24 office notes do you reflect that you performed a 25 mental status examination on Mr. Mazzamuto?</p>	<p style="text-align: right;">Page 63</p> <p>1 psychologists or counselors are in short supply. 2 Q Okay. Doctor, your office is located in 3 the Carlisle area? 4 A Yes, it is. 5 Q I'm just going to read a list of 6 individuals, and would you identify if any of these 7 are psychiatrist or whether they are psychologists? 8 Margery Andrews? 9 A Psychologist. 10 Q Kay Balsonus? 11 A I don't know. Psychologist, social 12 worker, counselor or something. 13 Q Okay. Brenda Barrick? 14 A Don't know her. 15 Q Joann Chambers? 16 A I think psychologist. 17 Q John Paul Checket? 18 A I assume a psychologist. I don't think 19 he's a physician. 20 Q Joann Koslet? 21 A Some kind of a counselor. 22 Q Nancy Demuth? 23 A She's a psychologist. 24 Q How about Catherine Ellis? 25 A Don't know her.</p>
<p style="text-align: right;">Page 62</p> <p>1 A I will take your word for it. 2 Q Doctor, I'm sure you would agree that one 3 way to treat somebody with anxiety and depression is 4 through the use of medications? 5 A Correct. 6 Q And another way of treating them or 7 treating somebody with conditions of anxiety and 8 depression might be some type of therapy? 9 A Could be. 10 Q Individual therapy, group therapy? 11 A Correct. 12 Q And would you agree that the only 13 treatment that you have implemented for 14 Mr. Mazzamuto is a regime of medicines? 15 A Correct. 16 Q And would you agree that you have not 17 recommended a psychologist or a psychiatrist? 18 A I don't think I have recommended a 19 psychologist, no. 20 Q And I believe that you had stated in your 21 direct testimony, Doctor Bower, that the reason you 22 didn't refer Mr. Mazzamuto to a psychologist or 23 psychiatrist was the lack of availability? 24 A Well, what I said that was psychiatrists 25 are in short supply. I did not say that</p>	<p style="text-align: right;">Page 64</p> <p>1 Q Kenneth France? 2 A Don't know, but not a psychiatrist. 3 Q Edward Franco? 4 A Psychologist. Has his own group. 5 Q Delores Hogg? 6 A Probably the wife of an attorney. I don't 7 know. Steven Hogg's an attorney. I don't know 8 about Delores. 9 Q Franco Psychological Associates? 10 A Well, that's back to Franco. We mentioned 11 him already. 12 Q How far, Doctor, is Harrisburg from 13 Carlisle? 14 A My professional medical opinion about 15 eighteen miles. 16 Q Is that too far to refer one of your 17 patients for psychiatric treatment? 18 A It's not too far, it's -- but it is a 19 matter of getting there, and it's a matter of, 20 again, availability of openings. You know, because 21 somebody's in the phone book doesn't necessarily 22 mean that they are easily available or seeing new 23 patients. 24 Q Have you ever examined the availability of 25 psychiatrists in the Harrisburg area?</p>

<p style="text-align: right;">Page 65</p> <p>1 A I know there are psychiatrists there, 2 sure. 3 Q Did any of them come to mind in referring 4 Mr. Mazzamuto? 5 A I didn't really think to -- I didn't think 6 that I wanted to refer Mr. Mazzamuto to a 7 psychiatrist. 8 Q And the reason? 9 A Again, I think he was -- we had him under 10 therapy here. I don't think he wants to go to a 11 psychiatrist. You know, with his cultural 12 background I don't think he was interested in seeing 13 a psychiatrist. Unfortunately mental health issues 14 are often colored by the fact that, you know, people 15 view them differently than other medical issues, and 16 while some people are very comfortable to come here 17 and get treatment, they don't have a desire to go to 18 a psychiatrist or a psychologist. 19 Q Doctor, do agree with me that you had 20 testified early that you think that Mr. Mazzamuto's 21 level of functioning has plateaued? 22 A It's -- yeah, I do. 23 Q And notwithstanding that fact, you still 24 don't want to refer Mr. Mazzamuto to a psychiatrist? 25 A I could ask him if he wanted to go.</p>	<p style="text-align: right;">Page 67</p> <p>1 Q Disabling condition. 2 A His back. 3 Q Doctor, do you recall when I took your 4 deposition on April 16, 2002? 5 A I remember you being here. I will take 6 your word for the date. 7 Q Okay. Do you recall at that time that you 8 were under oath? 9 A I do recall that. 10 Q Do you recall it was something similar to 11 this where I had asked questions and you provided 12 answers? 13 A Very similar to this, correct. 14 Q And Mr. Mazzamuto's counsel, Mr. Angino, 15 was there? 16 A He sure was. 17 Q And you promised to tell the truth, 18 correct? 19 A I try to. 20 Q Doctor, I'm going to read a question and 21 your answer. It's on page 59. I just want to be 22 sure that I'm reading this to you correctly. 23 A Go ahead. 24 Q On page 59? 25 A Uh huh (yes).</p>
<p style="text-align: right;">Page 66</p> <p>1 Q As a physician would you recommend if you 2 thought it was in his best interests to go? 3 A Well, again, at this point he seems to be 4 doing fairly well in his current situation with 5 regard to his marital -- you know, the marital 6 issues he was having, his anxiety in that now that's 7 he's not at the restaurant on a regular basis. So, 8 no, I mean, again, I don't feel compelled to refer 9 him to a psychiatrist unless he tells me that he's 10 having more distress as it pertains to his anxiety 11 and depression, that if the medications are 12 controlling things, you know, whether sending him to 13 a psychiatrist is going to better that situation at 14 this point I don't know. It doesn't change his back 15 issue, but, you know -- 16 Q Doctor, you had testified earlier that his 17 psychological condition was his major condition at 18 this point? 19 A That was at this point. That was right 20 after his heart attack. That was back in the year 21 2000. 22 Q Okay. Presently what is his major 23 condition? 24 A His major condition or disabling 25 condition?</p>	<p style="text-align: right;">Page 68</p> <p>1 Q The question is and if Mr. Mazzamuto 2 identified his work duties as twenty percent 3 bookkeeping, twenty percent office duties, and sixty 4 percent supervising employees, anything in his back 5 condition that would prevent from doing those types 6 of job duties? 7 Answer: I think he would be uncomfortable 8 again with sitting over a desk with the 9 bookkeeping. You know, what can people do, pain 10 tolerance and things like that are all individual. 11 Again, with his back, if that was his only issue, 12 could he muddle through further, he probably could. 13 Did I read that right? 14 A Yes, you did. 15 MR. ANGINO: And it's referring just to 16 his bookkeeping. 17 THE WITNESS: Correct. 18 BY MR. WOLGEMUTH: 19 Q Doctor, in treating somebody with anxiety 20 or depression, do you agree that an appropriate 21 treatment would be to recommend that that person 22 confront his anxiety, confront the situations that 23 caused the anxiety to help him become less anxious? 24 A Not necessarily, no. I mean, it depends 25 -- and sometimes anxiety is an internal thing, it's</p>

<p style="text-align: right;">Page 69</p> <p>1 a brain chemical thing. You know, I don't think --</p> <p>2 are you talking about if they fall off the horse, and</p> <p>3 they are anxious, so they get on the horse?</p> <p>4 MR. ANGINO: I'm going to at this point</p> <p>5 make an objection, and we will go off the record.</p> <p>6 MR. SIMMERS: Off the video record. The</p> <p>7 time is 4:29 p.m.</p> <p>8 (Off the video record.)</p> <p>9 MR. ANGINO: I have given great leeway to</p> <p>10 your asking him questions about seeking a</p> <p>11 psychiatrist, and seeking various forms of</p> <p>12 psychiatric type treatment. The case is about</p> <p>13 whether somebody is disabled or not disabled. We</p> <p>14 are not here questioning the Doctor's treatment or</p> <p>15 lack of treatment or referral, we are questioning</p> <p>16 whether he's disabled. According to Doctor Bower,</p> <p>17 he is disabled. So I think the relevancy or the</p> <p>18 likelihood of this leading to any relevant</p> <p>19 information, even if we were in a deposition, would</p> <p>20 be highly suspect. The fact that we are actually in</p> <p>21 a court setting, and we are asking questions of the</p> <p>22 Doctor, my objection at trial, as it is in this</p> <p>23 deposition since it's being taken for the forum --</p> <p>24 for the purpose of trial -- is that continuing to</p> <p>25 ask this Doctor questions about why and why he</p>	<p style="text-align: right;">Page 71</p> <p>1 perform the tasks that are central to the job, then</p> <p>2 I would say you are disabled whether it's from</p> <p>3 anxiety or backs or whatever.</p> <p>4 Q Okay. Doctor, I'm going to refer to what</p> <p>5 I have marked as D-1, which are your office notes.</p> <p>6 You agree with me, Doctor, that they are your office</p> <p>7 notes?</p> <p>8 A Uh huh (yes). They are from my record,</p> <p>9 correct.</p> <p>10 Q Now, turn to the office notes for August</p> <p>11 23, 2000?</p> <p>12 A Okay.</p> <p>13 Q Do you have them?</p> <p>14 A Yes, I do.</p> <p>15 Q And do you agree with me, Doctor, that</p> <p>16 nowhere in your office notes do you include any</p> <p>17 assessment of Mr. Mazzamuto's mood?</p> <p>18 A It says he is more emotionally labile. I</p> <p>19 don't know if that plot plays into mood per se.</p> <p>20 That's a reflection of his mental state or whatever</p> <p>21 you want to call it, mood or affect or whatever.</p> <p>22 It's kind of a global -- a global assessment.</p> <p>23 Q Okay. And do you agree that there's</p> <p>24 nothing in your notes for that day that reflect your</p> <p>25 assessment of his motor behavior?</p>
<p style="text-align: right;">Page 70</p> <p>1 didn't refer Mr. Mazzamuto to a psychiatrist, and</p> <p>2 what would psychiatrist do, and might the</p> <p>3 psychiatrist be able to help things, that has</p> <p>4 nothing at all to do with a case where Mr. Mazzamuto</p> <p>5 is suing his insurance carrier that sold him a</p> <p>6 policy that said that if he is disabled they were</p> <p>7 going to pay him, and they haven't paid him.</p> <p>8 So you can go back on record.</p> <p>9 MR. SIMMERS: I'm back on the video</p> <p>10 record. The time is 4:31 p.m.</p> <p>11 (On the video record.)</p> <p>12 BY MR. WOLGEMUTH:</p> <p>13 Q Doctor, how do you determine if an</p> <p>14 individual is disabled from anxiety or depression?</p> <p>15 A Well, first, again, let me preference</p> <p>16 that, again, I'm not a psychiatrist, and so I think</p> <p>17 that if somebody was unable to undergo the rigors of</p> <p>18 whatever was required of them in their job, if they</p> <p>19 were unable to concentrate, focus, recall, retain or</p> <p>20 perform the function of their job because their</p> <p>21 anxiety was such that it prevented them from</p> <p>22 functioning, that would constitute disability. Now,</p> <p>23 disability is a legal definition, usually not a</p> <p>24 medical diagnosis, but that's how I would probably</p> <p>25 -- if the condition leads to an inability to</p>	<p style="text-align: right;">Page 72</p> <p>1 A Yeah, I don't think that has any bearing</p> <p>2 on anything at that point.</p> <p>3 Q Now do you refer to his speech or his</p> <p>4 thought content?</p> <p>5 A No. Again, that's normally something one</p> <p>6 does when somebody is delirious or demented or</p> <p>7 having, you know -- again, that would be for</p> <p>8 different sorts of mental disorders, not for</p> <p>9 somebody who's anxious or depressed.</p> <p>10 Q Okay. Now, Doctor, I believe that you do</p> <p>11 identify that Mr. Mazzamuto suffered from anxiety</p> <p>12 symptoms?</p> <p>13 A Uh huh (yes).</p> <p>14 Q But you agree that you don't specifically</p> <p>15 identify what those symptoms were?</p> <p>16 A Correct.</p> <p>17 Q And, in fact, your notes don't reflect</p> <p>18 whether those symptoms were present while he was in</p> <p>19 your office, do they?</p> <p>20 A They do not.</p> <p>21 Q And do you agree, Doctor, that your office</p> <p>22 notes don't reflect what specific duties or</p> <p>23 activities were causing Mr. Mazzamuto's anxiety?</p> <p>24 A No, they do not reflect what duties were</p> <p>25 causing his anxiety, they just reflected that he was</p>

Condensed!

Page 73	Page 75
<p>1 anxious after his recent hospitalization for a heart 2 attack.</p> <p>3 Q Okay. Now, Doctor, I would like you to 4 turn to your office notes for November 29 of 2000. 5 Find them?</p> <p>6 A November 19. Got it.</p> <p>7 Q And, Doctor, am I correct that at that 8 time you indicated that Mr. Mazzamuto's chronic low 9 back pain was stable?</p> <p>10 A Let's see. It says chronic low back pain 11 controlled on Neurontin.</p> <p>12 Q Well controlled on Neurontin?</p> <p>13 A Correct.</p> <p>14 Q And I believe you state that at that time 15 his anxiety was doing well on Wellbutrin?</p> <p>16 A It was doing well, correct.</p> <p>17 Q All right. Doctor, let's move on to your 18 office notes of August 11 of 2001. Find that?</p> <p>19 A Uh huh (yes).</p> <p>20 Q Do you agree with me, Doctor, at that time 21 you diagnosed or your impression was that his 22 chronic anxiety was stable?</p> <p>23 A Correct.</p> <p>24 Q And would you agree that your definition 25 of stable or your use of the word stable means at</p>	<p>1 symptom that you would assess in terms of any type 2 of anxiety or depression on that specific day?</p> <p>3 A Right. Again, yeah, I think the focus on 4 that visit was primarily because of the numbness in 5 his leg. It does note that he was having chest 6 pain, and, again, I think there was a thought that, 7 again, since his heart had been re-tested and it was 8 normal, that, in fact, the chest pain might be a 9 symptom of anxiety. He was actually re-hospitalized 10 soon after he was out of the hospital for what 11 turned out to be not heart pain, and, again, chest 12 pain is a common symptom of anxiety as well. But I 13 think this visit was primarily regarding -- again, 14 the major focus of the visit was about the numbness 15 in his legs.</p> <p>16 Q Okay. Then, Doctor, on page -- that page 17 25 is that a continuation of your March 12 visit?</p> <p>18 A I don't think so. No, that's -- oh, 25.</p> <p>19 Yeah, 25 to 24 that's all one note.</p> <p>20 Q Okay. So the impression on page 24, I 21 believe No. 3 ongoing stress and chronic anxiety?</p> <p>22 A Uh huh (yes).</p> <p>23 Q So you apparently you did mention his 24 chronic stress at that point?</p> <p>25 A Well, again, if you -- the second</p>
Page 74	Page 76
<p>1 that time he was no -- that he was not expressing 2 current symptoms of anxiety?</p> <p>3 A It did not seem to be interfering with him 4 at that point.</p> <p>5 Q Doctor, do you agree with me that your 6 notes don't reflect any type of specific work 7 restrictions?</p> <p>8 A They don't. Again, he's self-employed, so 9 I don't really necessary give notes or give work 10 restrictions to people who are in charge of their 11 own business. I'm not even sure he was working at 12 that point to tell you the truth. That was in his 13 -- after his myocardial infarction, and he was 14 undergoing cardiac rehab. Whether he was at the 15 restaurant on a fulltime basis at that point I don't 16 know, but I don't think he was.</p> <p>17 Q Okay. Doctor, let's move on to your March 18 12, 2001 notes?</p> <p>19 A Okay.</p> <p>20 Q And, once again, Doctor, would you agree 21 that your notes don't reflect any assessment of his 22 mood or affective expression?</p> <p>23 A Right. Because he came in with numb legs, 24 and that's what we were focusing on on that visit.</p> <p>25 Q So your notes that reflect any type of</p>	<p>1 paragraph in the note on page 24 said he had an 2 episode where he became very upset at an insurance 3 agent, felt some chest pain, took two or three 4 nitros, felt like he was going to break out in a 5 cold sweat, and, again, having recently undergone 6 cardiac evaluation, which didn't show any further 7 blocked arteries in his heart, I was taking that as 8 a sign of perhaps his stress and anxiety, that he 9 was getting chest pain, again, from emotional upset.</p> <p>10 Q Okay. So this office visit just involved 11 the numbness to the lower leg?</p> <p>12 A That was the -- that was the initial 13 reason. It doesn't just involve it, it was the 14 major focus. No office visit in internal medicine 15 or primary care ever deals with just one primary 16 thing, there's always an, oh, by the way.</p> <p>17 Q And once again, Doctor, for March -- the 18 March 12, 01 office notes, you, again, don't reflect 19 any type of work restrictions for Mr. Mazzamuto?</p> <p>20 A I do not for the same reason I said 21 previously, he's self-employed.</p> <p>22 Q Doctor, let's move on to the June 19, 2001 23 notes. Do you agree with me, Doctor, that your 24 notes reflect at that time, which is the middle -- 25 in June of 2001, that his chronic anxiety was fairly</p>

Condensed!

<p style="text-align: right;">Page 77</p> <p>1 well controlled?</p> <p>2 A That's what it says.</p> <p>3 Q Would that mean that at that point then</p> <p>4 you didn't make the assessment of his mood or his</p> <p>5 motor behavior or his speech because it was well</p> <p>6 controlled?</p> <p>7 A Probably because of just his mood and his</p> <p>8 general -- his general affect, which is, again, his</p> <p>9 personality. Again, the motor behavior and speech</p> <p>10 things I think you can leave out because that's</p> <p>11 generally not a big issue for my concern here.</p> <p>12 Q And, again, Doctor, I know you have answer</p> <p>13 the same question, but that office note doesn't</p> <p>14 reflect any type of work restrictions for the same</p> <p>15 reasons?</p> <p>16 A For the same reason, that because he is</p> <p>17 his own employ -- he's his own boss, he has the</p> <p>18 ability to not do things if he knows they are</p> <p>19 bothering him. If you work for somebody else, you</p> <p>20 don't have that ability without getting into</p> <p>21 trouble.</p> <p>22 Q And as -- the fact that Mr. Mazzamuto</p> <p>23 is self-employed, would you then really have to</p> <p>24 rely upon him telling you whether he's able to</p> <p>25 performed these duties in assessing his ability to</p>	<p style="text-align: right;">Page 79</p> <p>1 when the lawyers get a hold of the records. Again,</p> <p>2 there was a time when medical records were for</p> <p>3 medical issues, now are just legal documents, but I</p> <p>4 go on too long.</p> <p>5 Q Again, Doctor, the point I was trying to</p> <p>6 make, the fact that you don't include work</p> <p>7 restrictions for someone like Mr. Mazzamuto is</p> <p>8 really up to Mr. Mazzamuto whether or not he can</p> <p>9 perform these job duties, do you agree with that?</p> <p>10 A Sure. I do agree.</p> <p>11 Q Doctor, in July 9 of 2001 -- do you have</p> <p>12 your office notes there in front of you?</p> <p>13 A I do.</p> <p>14 Q Okay. And do you agree with me that at</p> <p>15 that point -- I'm sorry, Doctor. I want you to</p> <p>16 refer to your August 20, 2001?</p> <p>17 A August 6 or August 31?</p> <p>18 Q I might have a --</p> <p>19 A There's a 6th on that page.</p> <p>20 Q Yeah. Just bear with me a second.</p> <p>21 No. Tell you what, let's move on to your</p> <p>22 December 19, 01.</p> <p>23 A Okay.</p> <p>24 Q Do you agree with me that at that time you</p> <p>25 found his depression and anxiety to be borderline</p>
<p style="text-align: right;">Page 78</p> <p>1 do that?</p> <p>2 A Not really, no. All I'm saying is that he</p> <p>3 does not have an external authority figure hanging</p> <p>4 over him that will reprimand him if he starts doing</p> <p>5 something that hurts and he stops because he's his</p> <p>6 own boss.</p> <p>7 I think when it comes to chronic pain, and</p> <p>8 when it comes to back pain, to a great degree you</p> <p>9 are always dependent on the person to tell you</p> <p>10 because there is no lab test for pain, there is no</p> <p>11 x-ray test for pain. You can document lack of nerve</p> <p>12 function, but there's absolutely nothing you can do</p> <p>13 to objectively test for pain. Pain is a subjective</p> <p>14 symptom. It's becoming very popular in medicine</p> <p>15 now. It's now the fifth vital sign.</p> <p>16 Now -- or every person who has any kind of</p> <p>17 discomfort, again, back to your scale before, you</p> <p>18 know, we are supposed to now be doing a 1 to 10 pain</p> <p>19 scale. That's now, that's not then, but, again,</p> <p>20 it's a totally objective phenomenon. So, yeah, when</p> <p>21 I say see these people here, I'm trying to make them</p> <p>22 better. I'm not seeing them for the purpose of,</p> <p>23 gee, what if at some point they are suing somebody</p> <p>24 or they are being sued, how can I best document</p> <p>25 their complaints today to make it look good later on</p>	<p style="text-align: right;">Page 80</p> <p>1 compensated?</p> <p>2 A Yeah, that's what I wrote.</p> <p>3 Q What exactly does that mean, Doctor?</p> <p>4 A Well,, he was getting by, but he was still</p> <p>5 having symptoms. He was having -- again, he was</p> <p>6 somewhat anxious, but he wasn't having, you know,</p> <p>7 terrible problems at that point.</p> <p>8 Q And you were medicating him at that time?</p> <p>9 A I would have to look back at my medicine</p> <p>10 flow sheets to tell you that, but I'm sure he was</p> <p>11 still on something at that point. I can tell you</p> <p>12 that in a minute.</p> <p>13 In December of 01 he was still on Ativan,</p> <p>14 he had just stopped Celexa, and we had not yet</p> <p>15 started Effexor. So that's -- wait a second. Oh,</p> <p>16 he was still on Celexa. So, yes, he was still on an</p> <p>17 anxiety depressant medicine, Celexa, and he was</p> <p>18 taking Ativan as needed at that point. So, yes, he</p> <p>19 was being medicated at that point.</p> <p>20 Q And what is Ativan, Doctor?</p> <p>21 A Ativan is a benzodiazepin antianxiety</p> <p>22 medicine similar to Valium. It gives fairly prompt</p> <p>23 relief from anxiety, but it's fair short acting. So</p> <p>24 it's used for sporadic control of anxiety symptoms,</p> <p>25 but it's not something that, you know, you would</p>

Condensed!

<p style="text-align: right;">Page 81</p> <p>1 have to take it multiple times a day for it to last 2 all day long. It's almost for breakthrough symptoms 3 you could say. 4 Q Okay. And, Doctor, at the end of your 5 first paragraph in the December 19, 2001 notes you 6 state that his mental state is stable? 7 A I guess -- yes, that's what I wrote. 8 Q And would that be referring, again, to his 9 anxiety and depression issues? 10 A Anxiety and depression. 11 Q Now, Doctor, in your notes of February 14, 12 2002 you again diagnose -- I'm sorry. Do you have 13 it? 14 A It have it now, yep. 15 Q You again diagnosis severe anxiety and 16 resultant depression? 17 A Uh huh (yes). 18 Q And, again, Doctor, do you agree that your 19 office notes don't reflect any type of assessment of 20 his mood, expression, behavior, speech or thought 21 content? 22 A That's true. I just wrote that he came in 23 for ongoing evaluation of his anxiety symptoms, 24 although I did not list them. 25 Q And, Doctor, would that also be true for</p>	<p style="text-align: right;">Page 83</p> <p>1 that I have been discussing with you? 2 A I sure do. 3 Q Doctor, you said there was a skin rash. 4 Was that a side effect of a medication? 5 A I don't know. I said it is possibly from 6 the Effexor, but it wasn't there at that time, and 7 it's always hard to diagnose a skin rash that's no 8 longer there. 9 Q And, Doctor, your notes reflect at that 10 time that his back was at baseline? 11 A Right. 12 Q What does that mean? 13 A It means it's the same as it was before. 14 Q Not getting any worse? 15 A Well, didn't comment that it was getting 16 worth. It was no better than previous evaluations. 17 Q Doctor, I would like to direct your 18 attention to your office notes of May 29, 2002. 19 Under your impression, do you agree that you 20 reported that his chronic anxiety was improved, but 21 still not resolved? 22 A Correct. 23 Q And you also reported no current symptoms 24 of ischemia? 25 A Correct. That means that he's not having</p>
<p style="text-align: right;">Page 82</p> <p>1 your office notes of March 14, 2002? 2 A That's true, other than saying that he 3 just does poorly, and that he's smoking more, and 4 more uncomfortable, but I did not comment on any 5 other specific symptoms. 6 Q Now, Doctor, under your No. 1, under 7 impression, I believe you state that the severe 8 anxiety and depression now becoming his biggest 9 problem? 10 A As of that visit, sure. 11 Q You mean that that problem was bigger than 12 his back problem? Is that what you meant by that? 13 A I think at the point of that visit, 14 correct. From his -- the symptoms he was having, 15 difficulty sleeping problems, you know, in that 16 regard I think as of that visit. I felt for that 17 visit it was his biggest problem, sure. 18 Q Doctor, I want to refer you to your -- I 19 think it's your April 22, 2002? 20 A Okay. 21 Q And, once again, I believe you identified 22 under impression as severe anxiety and depression? 23 A Uh huh (yes). 24 Q And, again, do you agree that you didn't 25 make any specific assessment of those five factors</p>	<p style="text-align: right;">Page 84</p> <p>1 chest pain referable to blocked arteries in his 2 heart. 3 Q Doctor, Mr. Mazzamuto apparently referred 4 to a niece or a nephew that had some type of medical 5 condition. Did he ever express that that itself was 6 causing him any type of anxiety or depression? 7 A He did. In fact, the previous note, 8 December 13 of 02 dealt with that. He had a niece 9 who had developed a brain tumor, and was undergoing 10 therapy at that point. 11 Q Okay. The stressor anxiety that was 12 related to that issue, that's something that just 13 arose recently, that's something that wasn't 14 occurring for the past year or years? 15 A No. That was -- I mean, again, I think 16 that I might have heard about it slightly before 17 that visit, but that was new I believe as of that 18 visit. That has not been one of his ongoing 19 problems, that's a relatively recent event in the 20 last year. 21 Q Doctor, let's move on to your August 2, 22 2002 notes. At that time you reported that his 23 coronary disease we had no current symptoms? 24 A Correct. 25 Q And that pretty much confirms what</p>

1 testimony you had on direct examination by

2 Mr. Angino?

3 A Correct.

4 Q And do you agree that you reported his
5 chronic anxiety was stable on his current medicine?

6 A Correct.

7 Q And, once again, Doctor, there's no
8 discussion about any type of work restrictions in
9 that office note for the reasons you previously
10 identified?

11 A Correct.

12 Q Okay. Doctor, let's move on to the office
13 notes of September 18, 2002. Do you agree with me
14 that in September you reported that his chronic
15 anxiety was seemingly better or under better control
16 today?

17 A That's what I said, correct.

18 Q Doctor, you also reported that there was a
19 noninvasive study of his lower extremity, and found
20 them to be normal?

21 A We were looking at the circulation to his
22 lower extremity, seeing if they were getting
23 adequate blood flow. If you have blocked arteries
24 to you leg arteries, and you are walking, that can
25 be a reason do get lower extremity pain. So we sent

1 the opinion of the specialist in that area that it's

2 a big problem for him. So, yeah, I don't necessary
3 do everything for his back every time he comes in.
4 He's been seen by a back specialist who says, yeah,
5 you got a back problem, and I can operate on you if
6 you want.

7 Q Okay. And do you agree, Doctor, that at
8 one point he had an EMG done?

9 A He did have an EMG done, and it was
10 normal.

11 Q And what does that reflect, Doctor?

12 A It means that there was no sign on that
13 test that the peripheral nerves in his legs were
14 being pinched.

15 Q Okay. In fact, did you see any tests at
16 all that suggest that his nerves were being impinged
17 or pinched?

18 A Again, the MRI as long as ago 1996 which
19 says the spine is being pinched. It says, you know
20 -- and so yeah. Again, not -- tests don't always
21 all agree with each other, so you have to take the
22 whole clinical scenario. So, again, you know, it
23 says the stenosis -- you know, that it impinges, and
24 it actually pinches off so that there's no flow of
25 cerebral spinal fluid in the area. So, again, we

1 him to a vascular surgeon to make sure that some of
2 his leg discomfort was not coming from poor blood
3 supply. He did the studies, he said the blood
4 supply is normal.

5 Q Okay. Now, I believe you had testified on
6 direct, Doctor, that you believe that Mr. Mazzamuto
7 had an impingement from stenosis?

8 A Again, based on his MRI findings, the
9 symptoms he describes, and, again, he was evaluated
10 fairly -- fairly completely by an orthopedic
11 surgeon, specialist, board certified in back
12 surgery, Doctor Gelb, who was previously at Hershey,
13 who, in fact, thought his symptoms all came from his
14 back, and recommended that he thought that surgery
15 might be an option for him if Mr. Mazzamuto was
16 willing to undergo that. Of course, he gave him no
17 guarantees, and said there's lots of potential
18 problems, but Doctor Gelb seemed to be quite
19 satisfied that his back was a big problem, and
20 thought that it was causing his symptoms, and again,
21 you know, part of these notes here where not
22 everything is covered with every visit, you know,
23 that was going on in the background. He was seeing
24 Doctor Gelb in 2000 and 2001 before Gelb left for
25 Baltimore, and you are right, and I sort of accept

1 have got symptoms that go along with a problem from
2 the spinal stenosis, we got a back specialist at
3 Hershey who tells me, yeah, this guy's got a back
4 problem, I have an EMG that says no, these nerves
5 here are not being pinched, but --

6 Q Okay. And that EMG was done more recently
7 than the 1996 MRI, do you agree?

8 A I agree.

9 Q Doctor, I want to direct your attention to
10 -- let me see if I can find this. Just bear with
11 me a second.

12 Okay. Your May 29, 1996 office notes?

13 A Okay.

14 Q I think you report there at the end of
15 your first paragraph that he has had several falls,
16 recently slipping out a chair, which seems to have
17 aggravated the problem?

18 A Uh huh (yes). That's correct.

19 Q In your office note of April 3, 1996, I
20 believe you report that he had fallen in January,
21 and then fell again last week hurting his back?

22 A Correct. That's why on the initial
23 insurance forms when it says when did this begin, I
24 couldn't be specific, and I sort of wrote both
25 January and April because, again, there seemed to be

<p style="text-align: right;">Page 89</p> <p>1 two events that kind of triggered that most recent 2 -- or that particular flare up. 3 Q Okay. And, Doctor, you are aware, aren't 4 you, that Mr. Mazzamuto claimed that he hurt his 5 back in July of 2000 while riding in the ambulance 6 to the hospital from the day he had his heart 7 attack? 8 A I'm sure, again, maybe he aggravated it 9 then. Again, I don't -- I think his back problem 10 long predates that, but, again, you know, chronic 11 back problems can be flared up by injuries, falls, 12 twists, you know, bad body positioning, things like 13 that. So that I didn't know that he was claiming 14 that the ambulance ride had anything to do with it, 15 but, again, lots of things -- you know, lying on a 16 catheterization table can be a very uncomfortable 17 thing for somebody with a chronic back condition, 18 but I think it's clear that his back problem dates 19 back, again, in the previous notes, as far back as 20 1992. 21 Q Okay. And do you agree with me, Doctor, 22 that slipping and falling on the ice, and falling 23 out of a chair are more of a significant trauma than 24 receiving a bump in a ambulance ride? 25 A I would agree that falling on the ice is</p>	<p style="text-align: right;">Page 91</p> <p>1 things at work, he did not specifically tell me that 2 he can't lift twenty pounds, that he can't lift a 3 particular thing. Again, I think that his back is a 4 problem, and I know that there are twenty pounds 5 items at his place of business. There are cases of 6 cheese, there are big vats of pizza dough, there are 7 big jars of -- of, you know, peppers. So, again, 8 you know, could he lift something twenty pounds, he 9 sure could. Can he do it over and over again, can 10 he do it repetitively, you know, can he do it day in 11 and day out, no, I don't think he can. 12 Q He can do it occasionally though, lift up 13 to twenty pounds, can't he? 14 A Yeah. Anybody can do anything 15 occasionally, but that's not the same as, you know, 16 doing your job. 17 Q And do you agree with me, Doctor Bower, 18 that Mr. Mazzamuto told you that he would have to 19 sit down and stand up in order to accommodate the 20 pain that he had? 21 A Sit down, stand up, and occasionally lay 22 down. It's kind of a continual shifting of 23 positions. 24 Q Now, Doctor, would you turn to your office 25 notes for 10/23/96?</p>
<p style="text-align: right;">Page 90</p> <p>1 probably the most significant of those things. 2 Again, I don't know what the bump in the ambulance 3 was. We live in Pennsylvania, there's lots of 4 potholes. I will refer judgment on that one. 5 Q Now, Doctor, I believe you had testified 6 some of the work restrictions when Mr. Angino was 7 asking you, that he shouldn't lift more than twenty 8 pounds? Does that sound about right? 9 A Yeah. 10 Q Did Mr. Angino ever tell you exactly what 11 he had to lift while he was working? 12 A Did he tell me, no. I was -- I have been 13 in the restaurant, I have seen the video of the 14 restaurant that Mr. Angino provided for me. 15 Q So you agree that Mr. Mazzamuto never 16 specifically told you what -- that he had to lift 17 heavy things at work? 18 A He did not tell me in my office that he 19 had to lift heavy things at work. 20 Q You are claiming that you saw him lifting 21 heavy things? 22 A I'm claiming that I saw heavy things in 23 the restaurant that go along with work in the 24 restaurant, and I'm not claiming to be an expert on 25 restaurants, but, again, he tells me he can't do the</p>	<p style="text-align: right;">Page 92</p> <p>1 A Okay. 2 Q Okay. At that time I believe you reported 3 that Mr. Mazzamuto still had intermittent -- I'm 4 sorry -- intermittent numbness in his both legs? 5 A Uh huh (yes). 6 Q And he still has low back pain, which is 7 improved? 8 A Correct. 9 Q And that he can basically work for about 10 one to two hours during the day. He's at the 11 restaurant much longer than that, but he's normally 12 seated, and not participating actively in the 13 physical labor? 14 A At that point that was true because he 15 couldn't. 16 Q Okay. And that's what Mr. Mazza -- I'm 17 sorry -- Mazzamuto told you back in October of 1996? 18 A That's truth. 19 Q In fact, October 23, 1996? 20 A Right. Another interesting thing from 21 that date is that his weight was 186 pounds then 22 too, and it's now 222 pounds. So things have 23 changed since 96. 24 Q Okay. Doctor, you agree with me the fact 25 that you recorded that he was working one to two</p>

Page 93	Page 95
<p>1 hours a day, but basically at the restaurant much 2 longer than that, but he was normally seated, and 3 participating actively in the physical labor 4 indicates to you that Mr. Mazzamuto was working 5 prior to that time, prior to October 23, 1996? 6 A He was at the restaurant. Again, because 7 he is not subject to -- that he's not subject to an 8 employer's whim as to what constitutes work, he owns 9 the place, so sure, he goes in. Now, what day -- is 10 he working, you know, is he just wanting to make 11 sure things are going well? I mean, that's -- 12 again, it's a much fuzzier area in my mind. 13 Again, I'm not an employment labor law 14 specialist, but the fact that it's his own business 15 I think blurs the lines between when are you 16 working, when are you there. You know, what -- it's 17 not the same as being employed by somebody elsewhere 18 where, when you are at the job, you are expected to 19 do something now, now, now, now, and so, again, had 20 he been at the restaurant during that time, yeah, 21 I'm sure he was. He owns it. His family owns it. 22 His wife's there. His kids are there. But is he 23 working? I mean, he putters -- I mean, I don't 24 know. I don't know what means. 25 Q Well, let's just go back to your notes.</p>	<p>1 anybody, the date on P-3, 10/23/96, is that same 2 date -- 3 A It is. 4 Q -- on the office note of 10 23/96? 5 A Right. 6 Q Do you agree? 7 A Uh huh (yes). 8 Q Okay. And on No. 13 you had indicated 9 that Mr. Mazzamuto was disabled from April 13, 1996 10 through October 23, 1996, which is the same day as 11 the office note? 12 A The day that I saw him, correct. 13 Q So clearly, Doctor Bower, the statement 14 that you made on the Attending Physician's Statement 15 dated October 23, 1996, couldn't have been correct? 16 MR. ANGINO: Objection. 17 MR. SIMMERS: Off the video record. The 18 time 5:04 p.m. 19 (Off the video record.) 20 MR. ANGINO: He just told you he only 21 could work one or two hours a day. Disability means 22 you can't work your job regular hours. I mean, how 23 can you say to him that, you know, they are 24 inconsistent. That's my objection. 25 Back on the record.</p>
Page 94	Page 96
<p>1 You basically said -- you say can basically work for 2 about one to two hours during the day. That means 3 -- 4 A Right, that's what he told me. 5 Q He was telling you he was working at least 6 one to two hours? 7 A He was doing some stuff one to two hours a 8 day. 9 Q But he was there a lot longer than that, 10 but just sitting down, and not really participating 11 actively in the physical labor? 12 A Correct. 13 Q That's what it says? 14 A That's what it says. 15 Q Now, Doctor, I want to refer you to 16 Plaintiff's Exhibit 3. It's a document that 17 Mr. Angino had previously given you. Do you have 18 that handy? 19 A Sure. 20 Q That's the Attending Physician's 21 Statement? 22 A Dated which date? 23 Q 10/23/96? 24 A Uh huh (yes). 25 Q Okay. Now, just so we are not confusing</p>	<p>1 MR. SIMMERS: Back on the video record. 2 The time is 5:04 p.m. 3 (On the video record.) 4 THE WITNESS: Well, again, I think he was 5 disabled up until that point. I saw him that day. 6 Whether he was at his restaurant for a couple of 7 hours or doing things for a couple of hours, again, 8 I don't think that constitutes, you know, being not 9 disabled. That's -- I mean, he's puttering around, 10 he's doing a few things, but he wasn't clearly doing 11 his normal activities. He wasn't doing his normal 12 job. So I don't think that's inconsistent. 13 BY MR. WOLGEMUTH: 14 Q You agree with me, Doctor, that that No. 15 13 doesn't say dates of continuous personal 16 disability? 17 A Well, I guess it doesn't, no. 18 Q In your own mind you know the difference 19 between personal disability and total disability? 20 A I would assume a total disability you 21 can't do anything. 22 Q Okay. And per Mr. Mazzamuto's discussion 23 with you on the same day, October 23, 1996 -- 24 MR. ANGINO: I'm going to have to go off 25 the record again.</p>

Page 97	Page 99
<p>1 MR. SIMMERS: Off the video record. The 2 time is 5:05 p.m. 3 (Off the video record.) 4 MR. ANGINO: The Supreme Court has said 5 that the fact that you can go into your office and 6 do some work for a couple of hours a day does not 7 mean you are partially disabled, it means you are 8 totally disabled. Partial disability has to mean 9 that you work an eight-hour day, and you could only 10 do part of your work. So when you are asking the 11 Doctor questions that have to do with the law, you 12 know what the Supreme Court has said with regard to 13 that. So I'm going to object to a question being 14 asked to a Doctor about a legal issue that you darn 15 well know the answer, and it doesn't have anything 16 to do with that. 17 MR. WOLGEMUTH: Okay. Well, I would like 18 to respond to that objection. The only relevant 19 issues here are what the contractual language 20 between a policy that Mr. Mazzamuto had and the 21 language contained therein. So regardless of what 22 Supreme Court decision you are referring to, I can 23 ask these question, and I intend to, and I will ask 24 the questions. 25 MR. ANGINO: And I can continue to object</p>	<p>1 disability in Mr. Mazzamuto's employment situation, 2 no. 3 Q Okay. At the very least, Doctor, you 4 agree with me that he could perform some of his job 5 duties as of October 23, 1996? 6 A He could do some of his job duties for a 7 short period of time. 8 Q Now, Doctor, Mr. Mazzamuto's anxiety and 9 depression, is that preventing him from doing his 10 job duties like bookkeeping? 11 A At some points it seemed that it did. 12 Whether it's -- you know, again, I don't know that 13 right off about -- right for this moment, but, 14 again, there were some points when he was telling me 15 he was too aggravated, he was too -- he would get 16 upset about everything, he couldn't concentrate, 17 and, again, and part of it was also that he just 18 couldn't sit for long enough. But at various points 19 during this whole saga there had been times when his 20 anxiety has prevented him from being able to 21 concentrate. He couldn't focus. 22 Again, it's a fluxing state as you can 23 tell by all the notes we have been going through 24 that, you know, things worsen a little bit, they get 25 better a little bit, they worsen a little bit.</p>
Page 98	Page 100
<p>1 to them -- 2 MR. WOLGEMUTH: Yes, you can. 3 MR. ANGINO: -- on that basis that 4 basically total disability means under the law, as I 5 understand the law, to mean that you cannot do your 6 job as you did it before. Partially disability 7 means you can go and do eight hours, forty hours a 8 week, but there's certain parts of your job you 9 can't do. So we can -- this is all a matter of 10 record. 11 MR. WOLGEMUTH: Let's go back on the 12 record. 13 MR. SIMMERS: Back on the video record. 14 The time is 5:06 p.m. 15 (On the video record.) 16 BY MR. WOLGEMUTH: 17 Q Doctor, referring again to P-3, Item No. 18 14, which states dates of partial disability, you 19 put a zero or slash through that? 20 A Right. 21 Q Okay. So in your view Mr. Mazzamuto was 22 totally disabled from 4/13/96 through 10/23/96? 23 A In my opinion, sure. 24 Q And he wasn't partially disabled? 25 A Not in my way of viewing partial</p>	<p>1 There's a constant ebb and flow to this, it's not a 2 static situation. 3 Q And you agree that at least it's my 4 understanding that his anxiety was -- and depression 5 was prohibiting him from being able to do like his 6 office duties, duties like as calling a food 7 supplier, checking prices, talking to service 8 people, talking to customers? 9 A Correct, that was my understanding. 10 Q And, again, just so I understand, and what 11 you are telling the jury is the reason he can't do 12 these type of job duties is because he might fly off 13 the handle in a rage or something to that effect? 14 A At that point in the past there was that 15 possibility. I think at this point he's doing 16 better in that regard. You know, that -- I don't -- 17 I think some of these anxiety issues have improved, 18 and, again, at some points the anxiety was his 19 biggest problem, at some points the back was his 20 biggest problem. When he was having a heart attack, 21 at that point it was his biggest problem. But the 22 relative importance of these things, again, has 23 fluxed. 24 Now, could he call a food supplier 25 tomorrow, and at that occasion do well in a limited</p>

Page 101	Page 103
<p>1 -- he probably could. Can he do it day in and day 2 out, again, back -- you know, part of the reason 3 that his stress levels are better now, and that he's 4 doing better from his anxiety is he's not in the 5 restaurant.</p> <p>6 At least that's my understanding of why 7 he's doing somewhat better, is that his family has 8 basically sent him home, and said, you know, stay 9 out of here, we don't want you getting upset. We 10 don't -- they are afraid that if he gets upset, his 11 blood pressure will go up, he will have a heart 12 attack, and I don't think that's a likely scenario, 13 but, again, they certainly see that he does get 14 upset if things aren't going well at the restaurant 15 especially because physically then, when the back 16 comes into it, he can't intervene, and just do it 17 himself.</p> <p>18 Q And, again, your opinion, the reason he 19 can't do these I will call them administrative type 20 duties is because of problems like the focusing, and 21 concentrating, and the inability to focus and 22 concentrate?</p> <p>23 A I think at some points it could be focus 24 and concentrating. At some points it could be 25 because his back just doesn't allow him to sit and</p>	<p>1 in there that Mr. Mazzamuto was actually having 2 problems coordinating things at work or focusing 3 things at work?</p> <p>4 A I'm not sure if that's ever not documented 5 in there or not. I have had discussions with his 6 wife. On other occasions, again, not as part of one 7 of his office visits, so it weren't show up on the 8 record, but, again, I guess I -- you know, I don't 9 know whether I specifically mentioned that or not 10 because, again, the focus of my visits here were 11 basically trying to take care of Mr. Mazzamuto.</p> <p>12 It was only after the fact, when asked to 13 fill out a form that says what can he do and what 14 can't he do, which is really not my concern when I'm 15 seeing him in the office, is to then try to go back 16 and figure out based upon what I know about him 17 medically and mentally, and come up with an 18 assessment, get those work restrictions you keep 19 asking about because, again, in my day-to-day 20 practice with Mr. Mazzamuto we don't spent a lot of 21 time with me telling him you can't lift things, you 22 -- you know, you can't be in a stressful situation, 23 you can't do those things, again, because he has -- 24 my understanding is he has the ability to not do 25 those things if he doesn't -- you know, if he</p>
Page 102	Page 104
<p>1 stand over the paperwork for a long periods of time, 2 and, again, a lot of this takes place in the 3 restaurant, where, again, he's sort of immersed in 4 the whole milieu of all the other stuff that's going 5 on, which comes to, again, re-aggravating the 6 anxiety issues because, when things are going poorly 7 or something is not right in the restaurant, he's 8 been having trouble dealing with that because, again 9 -- my understanding -- this is not -- you know, of 10 just knowing him, as a small business owner -- I 11 mean, I think small business owners, you know, have 12 their fingers enmeshed with their business, and, you 13 know, if you can't jump in and do things, it's a 14 very frustrating scenario.</p> <p>15 Again, could he do booking occasionally, 16 again, I'm sure he has good days and bad days as we 17 all do. I don't know whether he could sit at his 18 desk and do his bookkeeping everyday at the 19 restaurant, and call suppliers everyday at the 20 restaurant and perform adequately, I don't know.</p> <p>21 Q Doctor, do you agree with me that on those 22 notes that -- the office notes that I have 23 identified as D-1, which I think are all -- most of 24 your current notes through the end of 2002, that you 25 have nothing -- or that you don't indicate anywhere</p>	<p>1 doesn't have to. There's somebody compelling him to 2 do those things.</p> <p>3 So, again, when I fill out a form like 4 this, it's in some ways an artificial situation 5 where I now have to go back, look at my notes, look 6 at what I know about Mr. Mazzamuto, and then try to 7 put into plain language for an insurance company or 8 for disability or whatever what I believe to be the 9 limits of his disabilities, what I believe to be his 10 impairments, not that I necessarily felt the need to 11 spat all that in my medical record because in my 12 doctor-patient interaction with him that wasn't 13 really relevant at that point.</p> <p>14 In 1996 when I'm seeing Mr. Mazzamuto for 15 his back, for his anxiety after his heart attract, 16 my focus is not based upon how can I best document 17 here his mental status exam so that at some point 18 somebody questions whether or not he truly has 19 anxiety, it will be well documented in the record. 20 I was just trying to take care of his anxiety, his 21 depression. These forms from the insurance company 22 isn't -- is an attempt to basically quantify as best 23 I can what I know about him, and in part upon them 24 what I think reasonable restrictions would be, but 25 they don't show up in the records because at the</p>

Condensed!

Page 105	Page 107
<p>1 point of the records being made they really weren't 2 relevant to his medical care. 3 Q But you agree with me, Doctor Bower, that, 4 if Mr. Mazzamuto was telling you, Doc, I'm having 5 problems concentrating at work, I fly off in a rage, 6 I -- 7 MR. ANGINO: Objection. 8 MR. SIMMERS: Off the video record. The 9 time is 5:14 p.m. 10 (Off the video record.) 11 MR. ANGINO: You know he hasn't worked 12 since the year 2000. How in the world are you 13 asking him questions that he's going to say was he 14 flying off the -- you know, this -- how can you 15 press -- 16 MR. WOLGEMUTH: Mr. Angino, Doctor Bower 17 is testifying that part of Mr. Mazzamuto's 18 disability is his psychiatric condition, which 19 prevents him doing administrative duties, his other 20 type of duties. 21 MR. ANGINO: Right, but your question to 22 him was is he telling you that he can't do it at 23 work if he's not at work. I mean, the question I 24 have to say is such that you are implying to this 25 Doctor that Mr. Mazzamuto has been in some way</p>	<p>1 object, and go off the record. 2 MR. SIMMERS: Off the video record. The 3 time is 5:17 p.m. 4 (Off the video record.) 5 MR. ANGINO: Prior to July of 2000 he 6 didn't have his heart attack. Prior to July of 2000 7 I don't know that his records have anything to do 8 with emotionalism, so-- 9 MR. WOLGEMUTH: When did he have his 10 heart attack? 11 MR. ANGINO: In July 22 of 2000. 12 MR. WOLGEMUTH: He hasn't worked since 13 July of 2000, correct? 14 MR. ANGINO: Pardon me? 15 MR. WOLGEMUTH: He hasn't worked since -- 16 MR. ANGINO: And he hasn't worked since 17 then. So you are saying prior to July, how can he 18 have emotional problems -- okay. 19 MR. WOLGEMUTH: That's my question. 20 MR. SIMMERS: We are back on the video 21 record. The time is 5:17 p.m. 22 (On the video record.) 23 THE WITNESS: Prior to July of 2000 my 24 records do not indicate that he emotional problems 25 which kept him from doing administrative tasks.</p>
Page 106	Page 108
<p>1 working at all since the year 2000, and as he is 2 working since 2000 he is experiencing things as he 3 tries to work with figures, as he tries to do the 4 job when you took his deposition, you know he hasn't 5 worked since the year 2000. So that's my 6 objection. 7 MR. WOLGEMUTH: Okay. I will rephrase the 8 question. 9 MR. SIMMERS: We are back on the video 10 record. The time is 5:16 p.m., and we are now on 11 tape 2. 12 (On the video record.) 13 MR. WOLGEMUTH: I will rephrase my 14 question, Doctor Bower. 15 BY MR. WOLGEMUTH: 16 Q Prior to July of 2000 do you agree with me 17 that your office notes don't reflect any type of 18 indication that Mr. Mazzamuto was having problems 19 with concentration at work, with using the ability 20 to focus at work, with being overwhelmed by the 21 details at work, problems supervising employees 22 because of anxiety or depression? 23 MR. ANGINO: Prior to when? 24 MR. WOLGEMUTH: July of 2000. 25 MR. ANGINO: I will have to -- again, I</p>	<p>1 MR. WOLGEMUTH: Thank you. 2 BY MR. WOLGEMUTH: 3 Q Now, Doctor, are you aware that 4 Mr. Mazzamuto has described his responsibilities 5 that he performed at the restaurant to include only 6 executive and office duties? 7 MR. ANGINO: I'm going to object again. 8 Off the record. 9 MR. SIMMERS: Off the video record. The 10 time is 5:18 p.m. 11 (Off the video record.) 12 MR. ANGINO: You have constantly referred 13 to his application when he applied for insurance 14 back in 1992, and a particular form that he filled 15 out at one time. You know darn well that he 16 supplied you with a statement he says I have to 17 stand virtually all the time. So to ask this Doctor 18 if he knows of something, how could he possibly know 19 what you have in your records, which is in his 20 application, and which is a form that he filled 21 out? So I strongly object to your using such a 22 question to this Doctor as to something that he 23 wouldn't know. 24 MR. SIMMERS: Back on the video record. 25 The time is 5:19 p.m.</p>

Condensed!

<p style="text-align: right;">Page 109</p> <p>1 (On the video record.)</p> <p>2 THE WITNESS: No.</p> <p>3 BY MR. WOLGEMUTH:</p> <p>4 Q You are not aware of that?</p> <p>5 A I'm not aware of that.</p> <p>6 Q Okay. And if the records reflected that</p> <p>7 in this case, Doctor, would it surprise you?</p> <p>8 A I would think so, sure, especially seeing</p> <p>9 him at the restaurant in years gone by.</p> <p>10 Q And, Doctor, would -- were you aware that</p> <p>11 the plan described his duties to include managing</p> <p>12 employees, preparing work schedules, book work,</p> <p>13 interaction with food companies, administration and</p> <p>14 office duties?</p> <p>15 A That wouldn't surprise me if they were</p> <p>16 included.</p> <p>17 Q Doctor, were you aware that Mr. Mazzamuto</p> <p>18 described his duties to include fifty percent</p> <p>19 supervising, twenty-five percent bookkeeping,</p> <p>20 twenty-five percent other duties, occasionally</p> <p>21 lifting five pounds, sitting and standing three and</p> <p>22 a half hours, walking for an hour?</p> <p>23 A That would surprise me, sure.</p> <p>24 Q That would surprise you?</p> <p>25 A That would surprise me.</p>	<p style="text-align: right;">Page 111</p> <p>1 MR. WOLGEMUTH: Okay. We have it.</p> <p>2 MR. SIMMERS: Back on the video record.</p> <p>3 The time is 5:21 p.m.</p> <p>4 (On the video record.)</p> <p>5 BY MR. WOLGEMUTH:</p> <p>6 Q I'm reading from page 51 of</p> <p>7 Mr. Mazzamuto's deposition.</p> <p>8 The question is it looks like you did</p> <p>9 close to six million in actual</p> <p>10 transaction as buying and selling?</p> <p>11 Answer: Well, that is the in and out,</p> <p>12 yes.</p> <p>13 I would like to read from page 49 of his</p> <p>14 deposition.</p> <p>15 Question: Were you making your own</p> <p>16 investment buying and selling decisions in 2000?</p> <p>17 Answer: Yes.</p> <p>18 Mr. Mazzamuto -- the next question:</p> <p>19 Mr. Mazzamuto would it be fair to say that</p> <p>20 in the year 2000 with all these stock transactions</p> <p>21 that you were following the stock market fairly</p> <p>22 closely at least on CNN?</p> <p>23 Answer: Yes.</p> <p>24 Now, Doctor, Mr. Mazzamuto was asked if</p> <p>25 the things I just discussed with you caused any</p>
<p style="text-align: right;">Page 110</p> <p>1 Q Now, Doctor, I'm going to read some</p> <p>2 questions and answers from Mr. Mazzamuto's</p> <p>3 deposition that was taken on May 10, 2002.</p> <p>4 Question: It looks like you did close to</p> <p>5 \$6 million in actual transactions, buying and</p> <p>6 selling?</p> <p>7 MR. ANGINO: Objection.</p> <p>8 MR. SIMMERS: Off the video record. The</p> <p>9 time is 5:20 p.m.</p> <p>10 (Off the video record.)</p> <p>11 MR. ANGINO: Where he's going on this is</p> <p>12 that --</p> <p>13 MR. WOLGEMUTH: Is this an objection or</p> <p>14 are you coaching the witness to --</p> <p>15 MR. ANGINO: No, no.</p> <p>16 MR. WOLGEMUTH: -- respond to a specific</p> <p>17 question?</p> <p>18 MR. ANGINO: No. I'm objecting on the</p> <p>19 grounds --</p> <p>20 MR. WOLGEMUTH: Let's hear your objection</p> <p>21 then.</p> <p>22 MR. ANGINO: The basis of my objection is</p> <p>23 the relevancy of asking the Doctor for an opinion</p> <p>24 with regard to his stock investments. I don't think</p> <p>25 it's within his area to answer questions.</p>	<p style="text-align: right;">Page 112</p> <p>1 anger and anxiety. His answer was no.</p> <p>2 Now, my question to you, Doctor, is do you</p> <p>3 agree with me that Mr. Mazzamuto's ability to be a</p> <p>4 stock trader, to make investment decisions himself,</p> <p>5 to lose over \$300,000 trading stocks, to invest it</p> <p>6 and brought over \$6 million in stocks in one year</p> <p>7 would be inconsistent with his alleged inability to</p> <p>8 perform his supervisory and other office duties due</p> <p>9 to his anxiety and depression?</p> <p>10 MR. ANGINO: I have to object again, but</p> <p>11 I don't need to go off the record. It's -- all of</p> <p>12 the things that you have been asking him is subject</p> <p>13 to my first objection. Go ahead.</p> <p>14 THE WITNESS: Well, I guess it depends</p> <p>15 upon when during the year 2000 this all happened,</p> <p>16 you know, how much of it was pre-heart attack, and</p> <p>17 how much post-heart attack. You know, again, I</p> <p>18 think that it -- if he did successfully -- now, if</p> <p>19 he lost \$300,000, maybe he wasn't do so well. I</p> <p>20 don't know. I mean, I think if he was a wheeler</p> <p>21 dealer, and closing business deals, you know, yes,</p> <p>22 that would go against some of the other things we</p> <p>23 had talked about all together, but the year 2000</p> <p>24 includes seven months before his heart attack and</p> <p>25 five months after his heart attack, and I don't have</p>

<p style="text-align: right;">Page 113</p> <p>1 the specifics, and maybe you don't either, as to 2 when that all happened, were most of those trades 3 before, were most of them after, I don't know. So, 4 again -- 5 BY MR. WOLGEMUTH: 6 Q Well, Doctor, I believe the records will 7 reflect that the transaction occurred during the 8 entire year of 2000 and into 2001. And my question 9 is do you agree that engaging in that type of 10 activity's inconsistent with his complaints of 11 anxiety and lack of focus and concentration doing 12 simple administrative tasks? 13 A It could be inconsistent if it was a 14 persistent pattern, sure. 15 Q And, again, Doctor, Mr. Mazzamuto 16 testified that doing those activities didn't make 17 his anxious or didn't make him angry. Is that 18 consistent with somebody that is anxious, and 19 somebody that is suffering from depression? 20 A I don't think it's consistent, but I think 21 it also flies against what has been told to me by 22 his wife, and other, you know, things that have 23 happened at the restaurant, and whether his story, 24 you know, again -- again, it is inconsistent. 25 Q Doctor, I believe that your office notes</p>	<p style="text-align: right;">Page 115</p> <p>1 Q Was it possible that this letter was 2 drafted and in effort to Mr. Mazzamuto's Social 3 Security application? Would that ring a bell? 4 A Yeah, that sounds right. When he was -- 5 well, it might have been another legal person who 6 was working for Social Security -- 7 Q I'm sorry. 8 A -- and just wanted another summary of his 9 condition. 10 Q Okay. And were you aware as to the reason 11 of this individual's request as to why you were 12 drafting a report? 13 A Sure. Yeah. 14 Q So you knew it was going to assist him in 15 his -- 16 A It was going to document -- or to support 17 his claim for disability through Social Security. 18 Q Okay. So you were aware then that the 19 federal government was going to rely on your opinion 20 that you express in this letter in making a 21 determination of his benefits? 22 A Uh huh (yes). 23 Q Now, Doctor, I believe at that time on 24 April 16, 2002, in the first paragraph you basically 25 found him severely limited in his ability to stand,</p>
<p style="text-align: right;">Page 114</p> <p>1 had reflected that Mr. Mazzamuto's psychiatric 2 condition actually became worse during the course of 3 2001? Do you agree with that statement? 4 A I do. 5 Q Okay. And, again, do you agree with me 6 that at that time -- at that time you didn't refer 7 him to a psychiatrist or psychologist? 8 A I agree with that one hundred percent. 9 <small>Copy of letter dated April 16, 2002 from Ms. Trudy McGraw, The Wellington, from Douglas J. Bower, M.D. - produced and marked for identification as</small> 12 Exhibit No. D-2. 13 Q Doctor, I want to show you what I have 14 marked as D-2, and this letter has been previously 15 identified, but since I have them connected, I will 16 just give you both of them. 17 Doctor, this report that was dated April 18 16, 2002, it was addressed to Trudy McGraw. Do you 19 know who that person was or is? 20 A I do not recall. We get so many requests 21 from so much information from so many different 22 people. I cannot -- my recollection is that she was 23 a nurse, but working for either a legal firm or a 24 insurance firm or some -- but I -- at this point I 25 can't tell you who she is.</p>	<p style="text-align: right;">Page 116</p> <p>1 bend or sit for prolonged periods of time, and is 2 unable to work as a result of that reason? 3 A Correct. 4 Q And then you identified a second problem, 5 and perhaps even more severe problem, is that of his 6 chronic anxiety and depression? 7 A Correct. 8 Q So as of April 16, 2002 you believed that 9 the anxiety and depression was a more severe problem 10 than the back condition? 11 A It was perhaps. Again -- you know, again, 12 it's very hard to rank these things all the time, 13 but, again, I think I wanted to stress the fact that 14 probably at that point his anxiety was a major 15 problem, and it was one of the things that was 16 interfering with his ability to improve in that he 17 was smoking, in that he was gaining weight, in that 18 he -- you know, again, wasn't -- couldn't really 19 deal with the possibility of surgery. So, yeah, 20 it's a confounding factor in everything else. 21 Q Okay. And I believe the -- you identify a 22 third problem, and that is of coronary artery 23 disease? 24 A Right. 25 Q Now, you agree with me that he has</p>

Page 117

1 coronary artery disease, but his heart is stable?
 2 A His heart is stable at this point.
 3 Q Okay. So the heart wouldn't have been
 4 disabling as of April 16 --
 5 A As of April 16 it -- and as of today I
 6 don't think it's disabling.
 7 Q Okay. Doctor, I believe you touched upon
 8 this in your direct testimony, but you say because
 9 of his severe anxiety he's even unable to even
 10 consider the possibility of back surgery as he's
 11 extremely fearful that the surgery will render him
 12 either paralysed or induce further myocardial
 13 infarction?
 14 A Correct. That was his opinion especially
 15 back when the subject of surgery was first being
 16 thrown around after he saw Doctor Gelb, that he
 17 didn't -- he, in fact, told me that he just wouldn't
 18 consider it.
 19 Q Doctor, you would agree with me that that
 20 fear is a complete irrational fear?
 21 A The fear of a heart attack I think is an
 22 irrational fear. The fear of a not successful
 23 outcome, whether it's paralysis or just that you are
 24 left no better -- again, a standard line I use for
 25 my patients is that back surgery is a -- it's a

Page 118

1 court of last resort. When you can no longer go on,
 2 you go for back surgery because there is no
 3 guarantee of success, and there's no guarantee of
 4 improvement, and at times there's worsening. So
 5 that part of it I don't think is -- maybe paralysis
 6 is irrational, though, again, look at any informed
 7 consent that is required these days, and it's
 8 there. And if -- you know, if you a little hesitant
 9 to begin with, and you were told there's a risk of
 10 paralysis, a risk of impotence, a risk of bleeding,
 11 a risk of infection -- you know, these are what we
 12 are required to tell people these days when we do
 13 things to them. Even if they are not highly likely,
 14 we got to tell them, and that does scare people.
 15 And, again, you know, this was a year plus -- almost
 16 a year ago. Again, I'm not sure whether he would
 17 have that same opinion today, but at the time that
 18 this was all going on, and when he first saw Doctor
 19 Gelb -- because clearly you don't send somebody to a
 20 back surgeon if you already know that, you know,
 21 they don't want to have surgery, but it was after he
 22 met with Doctor Gelb, and after Doctor Gelb
 23 explained things to him that he said no way, not
 24 getting close to me.
 25 Q Is the opinion that surgery will not help

Page 119

1 him or will help him?
 2 A The opinion is that surgery may help him,
 3 and you can -- I don't know if you have Doctor
 4 Gelb's records in your file, but, again, you can
 5 read his actual things that he told him.
 6 Q Doctor, I'm going back to the anxiety and
 7 depression. I believe you report that the condition
 8 has been what -- somewhat refractory to multiple
 9 medical interventions?
 10 A Correct.
 11 Q Does that mean --
 12 A That we tried several different
 13 medications, and, you know, again, he had periodic
 14 worsening. I think these days it's a little better,
 15 but, again, at the point of that -- at the time of
 16 that letter, yeah, we had tried several things, and
 17 it still wasn't, you know, satisfactory.
 18 Q Okay. So back in April about a year ago,
 19 April of 2002, you had tried various medical --
 20 various medicines, and they weren't working that
 21 well?
 22 A They were not getting the effect of
 23 totally relieving his anxiety, correct.
 24 Q Presently that's better?
 25 A I believe it is better.

Page 120

1 Q And has -- have you changed medications?
 2 Have you changed something to make it better?
 3 A I think his circumstances have changed.
 4 He's -- like I said, he's basically been ejected
 5 from the restaurant, so he's not involved in that on
 6 a regular basis any more.
 7 Q And to your knowledge, Doctor, he hasn't
 8 worked at the restaurant since July of 2000, right?
 9 A Again, I don't know how -- you know, has
 10 he been in the restaurant, I'm sure he's been in the
 11 restaurant a lot. Now, what constitutes work is a
 12 whole other problem. I mean, that I don't know.
 13 Again, he's still the owner of the restaurant, he
 14 goes in there, he eats there, his family is there.
 15 Does he pick up something once when he's there, I
 16 have no idea, I don't spy on him.
 17 Q Okay. So you --
 18 A I don't know.
 19 Q What you are saying is, Doctor, from July
 20 of 2000 to the present you are not really certain
 21 what his responsibility have been there?
 22 A I'm not sure what his actual activities
 23 have been there.
 24 Q Fair enough. Did you consider, Doctor,
 25 treating that fear that he expressed to you about

1 his back surgery? Is that something you would treat
2 as a physician treating people with psychiatric
3 and --

4 A Well, we were, we were treating his
5 anxiety. I mean, I don't know that there's a
6 specific fear of back surgery treatment, but, I
7 mean, again, we were -- we have continually altered
8 his medications when it comes to his anxiety and
9 things like that.

10 Now, if somebody doesn't want to have
11 surgery, can you coerce them into it or can you --
12 again, you know, people have different thoughts
13 about that, and, you know, again, is it irrational
14 to fear back surgery? Well, maybe it's irrelevant
15 to think you are going to get a heart attack from
16 it, and maybe it's irrational to think you are going
17 to be paralyzed, but is it irrational just not to
18 want to have surgery, again, I don't know whether
19 that's irrational. But, no, we didn't do any
20 specific therapy in an effort to make him more
21 agreeable to having surgery.

22 MR. WOLGEMUTH: Okay. Just go off the
23 record for a second.

24 MR. SIMMERS: Off the video record. The
25 is time is 5:34 p.m.

1 (Off the record.)

2 MR. SIMMERS: Back on the video record.
3 The time is 5:36 p.m.

4 (On the video record.)

5 BY MR. WOLGEMUTH:

6 Q Just so I understand it, Doctor, as of
7 today, as of March 26, 2003, you are claiming that
8 his back condition is his most disabling condition,
9 and his psychiatric condition is secondary?

10 A Correct. I think that's the ranking as I
11 now see it.

12 Q Okay. And, Doctor, when I took your
13 deposition back in April 16, 2002, was your opinion
14 different?

15 A I think at that point the anxiety symptoms
16 were higher, and I think, you know, again, he was
17 still -- again, when I look at him as a patient, I
18 see beyond just these issues, and he's smoking, he's
19 gaining weight, you know, I see the realm of the
20 heart issue coming back onto the scene. It's not a
21 present problem, but all that stuff I think was
22 smoldering back then as well, that his weight was
23 going up, he wasn't taking care of himself, he
24 wasn't doing any activity of any kind, you know,
25 and, again, I think that at that point my opinion of

1 him was that the anxiety was the thing that was
2 putting most of the risk into his life, and was more
3 apparent to him at that point than anything else.
4 It was also something did, again, kept him from
5 considering surgery.

6 Since that time he hasn't been working.
7 He seems to be doing better from a mental
8 standpoint, but his back doesn't seem like it's
9 getting any better. So I think those probably have
10 flipped flopped over the last couple of years. The
11 anxiety after the heart attack was severe for a
12 while. It peaked and valleyed. We changed things
13 around. Time has gone by, I think the anxiety has
14 lessened, but, you know, it's still there. He
15 still, you know, again, has symptoms, but I think
16 the back is clearly his major disabling feature at
17 this point.

18 Q Okay. And I just want to read a portion
19 of your testimony, Doctor, just to make sure -- to
20 make sure that this -- what I'm reading summarizes
21 your current or you opinion as of April of 02. I'm
22 reading from page 58, beginning on line 19:

23 My opinion, and I have stated several
24 times, it's his psychiatric problems right now that
25 are his primary limiting factor. His back problem

1 runs a close second.

2 A That's what I -- yes, that's true.

3 Q Okay. And that was your opinion as of
4 April of 02?

5 A That was my opinion as of a year ago,
6 correct.

7 Q One or two more questions, Doctor. You
8 had testified on direct that while treating
9 individuals with severe psychiatric problems that
10 you have on occasion referred them?

11 A Huh uh (yes), I have.

12 Q Where did you refer them?

13 A We have gotten a psychiatrist, Doctor
14 Rosenthal, who's local now. Again, he doesn't see
15 people quickly, and he doesn't seem them often, but
16 he's available. You know, these are people that,
17 you know, again, that we really have no great
18 experience in managing, people who become psychotic,
19 people who -- you know, schizophrenics, and things
20 like that, and just, you know, people who just
21 aren't functioning whatsoever.

22 But, yeah, we do have -- there's a couple
23 -- there's the Stevens Center, but, again, the
24 problem with the Stevens Center is it takes a long
25 time to get in, and then the personnel is constantly

<p style="text-align: right;">Page 125</p> <p>1 changing, and there's a lot of dissatisfaction of 2 what happened to people once they are there, and 3 it's local. There are psychiatrists there, but, 4 again, it's just not a great resource because 5 there's no continuity, you see somebody for a month 6 or two, and then it's a new body, it's a new face. 7 And, again, they will take a fifteen minute, you 8 know, how's it going, great, here's your medicines, 9 good-bye. And so those options didn't see like they 10 would add significantly to his care. 11 Q Okay. And you do agree that there are 12 plenty of psychiatrists in the Harrisburg area? 13 A Again, I guess a better question is are 14 there plenty of available psychiatric patient 15 appointments available in Harrisburg, and that I 16 don't know. There is certainly a shortage of 17 psychiatric and mental health care in general in 18 central Pennsylvania. I don't know how many 19 psychiatrists there are in Harrisburg. 20 Q Okay. Fair enough, Doctor. Doctor, you 21 had testified that -- excuse me -- that 22 Mr. Mazzamuto is walking or his posture has -- 23 includes like a little -- what do you call it, a 24 hunch or a stoop? 25 A Yeah, he just -- he leans forward. He</p>	<p style="text-align: right;">Page 127</p> <p>1 Again, he doesn't have the impingement on the 2 outside as my understanding where the nerves are 3 coming out, the cord itself is being compressed. 4 So it's not as -- see, with a disk, you 5 very clearly often just pinch a nerve at a 6 particular place, which gives you one side symptoms 7 in a very defined dermatomal distribution. But, 8 again, my understanding from reading the reports is 9 that his problem is more of the entire complex, if 10 you look at it, is being pressed backwards. It's 11 not necessarily just this nerve root being clipped. 12 So he's going to have -- again, he doesn't 13 have a pure L2 radiculopathy or 2 -- L-4 because, 14 again, when you have a ruptured disk, it's usually 15 unilateral, it's on one side, and it's very focal. 16 He has diffuse bilateral leg pain. So -- 17 so, again, it's not the same as a nerve root 18 problem. I mean, I don't think his -- his is not a 19 nerve root problem, it more of the cord itself is 20 being pressed, and the cord has all the fibers from 21 all the roots at that level down, so it could hit 22 anything. 23 Q So if there's compression on the cord, 24 that pressure could reflect on symptoms on any -- 25 various types of distribution?</p>
<p style="text-align: right;">Page 126</p> <p>1 leans forward. 2 Q And you also I believe stated that you had 3 seen the video that Mr. Mazzamuto had made of his 4 day in the life of the -- 5 A I did. 6 Q -- restaurant? When you viewed that 7 video, did you observe him having that stoop or that 8 problem, you know, with his back? 9 A In the video he actually seemed to have 10 more of a stoop then I have observed him be here. 11 Q More of a stoop? 12 A More of a stoop. 13 Q Okay. Final question, Doctor. 14 Mr. Mazzamuto has L3-L4 stenosis? 15 A He has L2 through L5 stenosis, worse at L3 16 -- maximum at L3 as of 1996. 17 Q Okay. You stated that correctly. I 18 didn't mean to misrepresent it. 19 A That's okay. 20 Q The nerve roots that come out at L3-L4, 21 what parts of the legs do they feed? What's -- the 22 dermatomes or am I stating that correctly? 23 A Well, again, the thing is he's not -- he's 24 not actually -- the nerve roots are not really what 25 seems to be impinged as much as the spinal cord.</p>	<p style="text-align: right;">Page 128</p> <p>1 A Well, on both sides because, again, the 2 nerve -- it's the fibers that are in the cord, 3 little pieces of them then branch out, and become 4 the nerve roots. If you pinch it at the cord, what 5 you can get any of those fibers regardless of which 6 root they are going to eventually become. If you 7 get pinched at this opening here, it gets one purely 8 defined root, and, again, and that's the things that 9 really lay out nicely in a dermatomal distribution, 10 and that may clip off a particular reflex or be numb 11 along the side, or the front, or the back of the 12 leg, or go down the back, which is consistent with 13 sciatica. 14 But he has bilateral symptoms, and he has 15 them in both sides and they are more diffuse than 16 that, and, again, my understanding of why that was 17 is that, again, it's not a clean nerve root problem 18 from a lateral compression, it's a cord being 19 pinched by the central canal. That's why it's a 20 central stenosis rather than a radicular symptom on 21 one side or the other. He has bilateral symptoms. 22 MR. WOLGEMUTH: Thank you, Doctor. 23 That's all the questions I have. 24 REDIRECT EXAMINATION 25 BY MR. ANGINO:</p>

Page 129	Page 131
<p>1 Q Doctor, we will try to kind of go through 2 some things in a summary fashion. 3 Mr. Mazzamuto's date of birth is what? 4 A 5/25/55. 5 Q So May of 1955? 6 A Correct. 7 Q So that as of 1992 he would have been like 8 forty-seven or so? 9 A 1992. No, he would have been 10 thirty-seven. 11 Q Thirty-seven? 12 A Thirty-seven. 13 Q So in 1992 he was thirty-seven, and at 14 that time he was already diagnosed as having the 15 stenosis, is that correct? 16 A No. I think the diagnosis of stenosis 17 came in 96. I think he's had -- he had back pain 18 which predates my involvement, but when I fill out 19 the forms and they say have you ever had a similar 20 condition in the past, the back pain, looking back 21 through the notes when Doctor Robinson took care of 22 him, I found that he had had back pain back in 23 1992. I don't think it was diagnosed as spinal 24 stenosis at that point. 25 Q I think the record will show by the time</p>	<p>1 BY MR. ANGINO: 2 Q Doctor, from what I understand from your 3 testimony Mr. Mazzamuto's stenosis is a combination 4 of a congenital condition where he has a narrow 5 canal, and what we call degenerative arthritis, is 6 that correct? 7 A Correct, but, again, the arthritis 8 component would be more laterally, it doesn't seem 9 to be contributing. It seems that the congenital 10 part of it is just gradually increasing. 11 Q All right. So this congenital component 12 as he got older it's getting narrower and narrower, 13 is that right? 14 A Correct. 15 Q So that what we have is a man who already 16 at thirty-seven is having back pain, is already 17 showing up, if it does show up, in an x-ray as being 18 stenosis already there. By the time 1996 comes by 19 we are talking in terms of another four years, so 20 he's now at forty-one years of age, and you were 21 asked questions about some records back in 1996. 22 This was the same time period where I asked you 23 questions as to the MRI, and you read about the MRI, 24 but if you look at your notes with regard to those 25 early periods of time, I'm looking at what appears</p>
Page 130	Page 132
<p>1 your testimony comes forth that there was an x-ray 2 back in 1992 that did show the stenosis, and if that 3 is true, then there would have been an x-ray as 4 early as 1992 when Mr. Mazzamuto was thirty-seven 5 years of age showing already a stenosis, is that 6 right? 7 A If there's an x-ray, yes, that's true. 8 MR. WOLGEMUTH: Okay. Objection. 9 MR. SIMMERS: Off the video record. The 10 time 5:45 p.m. 11 (Off the video record.) 12 MR. WOLGEMUTH: I'm not aware of any 1992 13 x-ray, so I'm just objecting to preserve -- 14 MR. ANGINO: Sure, preserve it. You will 15 find though that there was something when he was in 16 a hospital, but his back was x-rayed and there was 17 because that's why they tried to get out of in 18 1996. They were contending that he knew -- 19 MR. WOLGEMUTH: Knew of that condition of 20 that or something? 21 MR. ANGINO: Yeah. So you will find 22 that. 23 MR. SIMMERS: We are back on the video 24 record. The time is 5:46 p.m. 25 (On the video record.)</p>	<p>1 to be -- it's cut off here -- 24 of 96. Do you 2 know -- 3 A Right. 4 Q That particular period of time here what 5 it's saying is his legs have been getting numb. 6 Last night he got out of bed. He fell down because 7 of the numbness, is that right? 8 A Correct. 9 Q And if you turn to the next, it's May 29 10 of 1996, legs have a pinching sensation. Very weak 11 yesterday. Lower back pain. Fell yesterday. Legs 12 gave out, is that correct? 13 A Correct. 14 Q So we are talking now thirty-seven, 15 forty-one. Now, four years later in the year 2000 16 he is now forty-five years of age in the year 2000, 17 is that right? 18 A That's correct. 19 Q And what's your opinion about is this 20 going to continue to get worse, continue to get 21 narrower, so when he's age forty-one narrower than 22 it was when he was age thirty-seven? 23 A I think it will continue to progress. 24 Q Okay. And the situation is that back when 25 he was thirty-seven in 1996 you did write some of</p>

Page 133	Page 135
<p>1 those forms for the same New York Life Company</p> <p>2 that's involved in this case, is that right?</p> <p>3 A That's correct.</p> <p>4 Q And back in that period of time he was</p> <p>5 doing the same job, is that right?</p> <p>6 A That's correct.</p> <p>7 Q And, Doctor, we know from the records that</p> <p>8 they paid him for his loss in 1996.</p> <p>9 MR. WOLGEMUTH: Objection.</p> <p>10 MR. SIMMERS: Off the video record. The</p> <p>11 time is 5:49 p.m.</p> <p>12 (Off the video record.)</p> <p>13 MR. WOLGEMUTH: Again, what we did in</p> <p>14 1996 is not relevant to what we did in 2000.</p> <p>15 MR. ANGINO: All right. Back on the</p> <p>16 record.</p> <p>17 MR. SIMMERS: Back on the video record.</p> <p>18 The time is 5:49 p.m.</p> <p>19 (On the video record.)</p> <p>20 BY MR. ANGINO:</p> <p>21 Q Doctor, in 1996 the only condition that he</p> <p>22 had for which you filled out the forms was the back,</p> <p>23 is that right?</p> <p>24 A That's correct.</p> <p>25 Q By the time the year 2000 came about, and</p>	<p>1 that right?</p> <p>2 A Some of them who are mentally fit, yes,</p> <p>3 they can.</p> <p>4 Q And a number of the questions that defense</p> <p>5 was asking you about can you do some books, can you</p> <p>6 call some suppliers, can you -- even quadriplegics</p> <p>7 can do that, is that right?</p> <p>8 A With the right equipment, sure.</p> <p>9 Q Sure. So even somebody who has no arms,</p> <p>10 has no legs certainly can do the types of things</p> <p>11 that he was asking you questions can</p> <p>12 Mr. Mazzamuto do, such as do some books or make some</p> <p>13 calls or even supervise, is that right?</p> <p>14 A Under extreme conditions, I guess sure.</p> <p>15 Q Sure. So when you were asking questions,</p> <p>16 and you were filling out forms, when you use the</p> <p>17 world total disability, were you using a practical</p> <p>18 definition of whether somebody can go out and get a</p> <p>19 job and do the job?</p> <p>20 A My opinion was for the global -- the</p> <p>21 global assessment of the entire patient as to</p> <p>22 whether or not he could fulfill his job requirements</p> <p>23 or do his job.</p> <p>24 Q And as far as you understood his job, it</p> <p>25 was a man who was standing behind a counter, it was</p>
Page 134	Page 136
<p>1 you started filling out the forms, you had three</p> <p>2 conditions then, is that right?</p> <p>3 A That's correct.</p> <p>4 Q You had the heart, you had the back, and</p> <p>5 you had the emotional element, is that right?</p> <p>6 A That's correct.</p> <p>7 Q And, Doctor, with regard to the back, from</p> <p>8 what you have told us the back was even worse than</p> <p>9 in 2000 than it would have been in the year 1996,</p> <p>10 he's four years older, and now he also has an</p> <p>11 emotional component, is that right?</p> <p>12 A That's correct.</p> <p>13 Q Would you expect the emotional component</p> <p>14 to make his condition worse as far as doing a job of</p> <p>15 any sort?</p> <p>16 A When it's bad, yes.</p> <p>17 Q Okay. Doctor, I have been listening</p> <p>18 patiently for the questions that have been asked of</p> <p>19 you, and when I was out in your waiting room there I</p> <p>20 saw a woman in a wheelchair. I assume occasionally</p> <p>21 you have patients who are in wheelchairs, is that</p> <p>22 right?</p> <p>23 A That's correct.</p> <p>24 Q And those patients in wheelchairs probably</p> <p>25 can call a supplier, and get certain supplies in, is</p>	<p>1 a man who was walking around, it was a man who was</p> <p>2 cooking at times, it was a man who was lifting at</p> <p>3 times, as well as ordering some things, and picking</p> <p>4 up the orders, it involved that global -- that --</p> <p>5 all of those things, is that right?</p> <p>6 A That was my understanding of his job.</p> <p>7 Q And so that if he couldn't do all of those</p> <p>8 things, then it was your opinion he was totally</p> <p>9 disabled, is that right?</p> <p>10 A That's correct.</p> <p>11 Q And as far partial disability, would you</p> <p>12 assume at least from a practical standpoint since we</p> <p>13 are dealing with potentially a legal issue, is that</p> <p>14 you can only do a part of your job, but you still</p> <p>15 can put in an eight-hour day, you can still do forty</p> <p>16 hours a week, somebody will still hire you, is that</p> <p>17 right?</p> <p>18 A Yes. Partial disability in my way of</p> <p>19 thinking is that you have restrictions as to what</p> <p>20 you are allowed to do, but you still fulfill most of</p> <p>21 the requirements of your job.</p> <p>22 Q One thing I heard that was really strange</p> <p>23 was he said now the MRI was taken in 1996, but the</p> <p>24 EEG was taken later.</p> <p>25 MR. WOLGEMUTH: Objection.</p>

Condensed!

Page 137	Page 139
<p>1 MR. ANGINO: Do you remember that 2 question? 3 MR. WOLGEMUTH: It was an EMG. 4 MR. ANGINO: Okay. I'm sorry. I will 5 rephrase it. 6 BY MR. ANGINO: 7 Q Doctor, do you recall a question being 8 asked of you that an MRI was taken in 1996, but an 9 EEG -- 10 A EMG. 11 Q -- EMG, was taken later? 12 A I do. 13 Q The fact that an MRI was in 1996, if you 14 would take that test later, the condition would not 15 be better, is that right? 16 A My assumption would be it would either be 17 the same or worse. 18 Q That's right. So actually the fact that 19 the MRI was 1996, and we are now into the year 2003, 20 the assumption is that his back condition from an 21 MRI is worse or at least the same, is that right? 22 MR. WOLGEMUTH: Objection. Objection. 23 MR. SIMMERS: Off the video record. The 24 time 5:53 p.m. 25 (Off the video record.)</p>	<p>1 being an orthopedic surgeon in charge of back 2 surgery at Hershey Medical Center, and when I had 3 asked you questions earlier about when you were 4 looking for somebody for specialist to do surgery, 5 you would refer them to orthopedic surgeons, and 6 that is the type of person that Doctor Gelb was, is 7 that right? 8 A Either an orthopedic surgeon who does back 9 speciality or a neurosurgeon. I think even then you 10 want to go to somebody who specializes primarily on 11 the back since there are orthopedic surgeons who 12 spend most of their time doing hips and knees and 13 shoulders, but Doctor Gelb was a back only 14 gentlemen. 15 Q And Doctor Gelb would be the type of 16 physician upon whom you would rely, refer, and 17 utilize in your treatment and care, is that right? 18 A Correct. 19 Q And Doctor Gelb confirmed, did he not, 20 your diagnosis that he has this stenosis, is that 21 right? 22 A It was his opinion in the letter that he 23 had the stenosis, and that his symptoms were coming 24 from it, and that surgery would be an option. 25 Q So that basically he supported what you</p>
Page 138	Page 140
<p>1 MR. WOLGEMUTH: You are asking the Doctor 2 to speculate. There is no current MRI. 3 MR. ANGINO: Okay. Back on the record. 4 MR. SIMMERS: Back on the video record. 5 The time is 5:53 p.m. 6 (On the video record.). 7 BY MR. ANGINO: 8 Q Doctor, are you certain as far as 9 reasonable certainty in medicine could be that, if 10 an MRI showed a condition in 1996, and you took an 11 MRI today in 2003, it would be at least as bad, if 12 not worse? 13 A In this condition, yes. 14 Q Yes. You don't get better from this 15 condition as far as an MRI shows? 16 A The bony changes don't change, no. 17 Q And, Doctor, there is a mention -- a 18 person you mentioned on several occasions, Doctor 19 Gelb, is it? 20 A Doctor Gelb. G-E-L-B. 21 Q And Doctor Gelb is an orthopedic surgeon, 22 is that right? 23 A He was the orthopedic surgeon in charge of 24 back surgery at Hershey Medical Center. 25 Q So here's a man with the credentials of</p>	<p>1 were doing in terms of prescribing medication for 2 back pain coming from a stenosis, is that right? 3 A He did. 4 Q But he said there might be another option, 5 is that right? 6 A He said that surgery might be another 7 option. 8 Q And as far as surgery, you said there are 9 various reasons to go with surgery or not to go with 10 the surgery, and a decision either way would be a 11 rationale one, is that right? 12 A That's correct. 13 Q Now, much of the questioning asked of you 14 dealing with the emotional element, when you work 15 with your medical records, and somebody comes in, 16 and they say to you I'm depressed, or I'm irritable, 17 or my wife and I are having some real problems 18 emotionally, and things like that, do the medical 19 records generally show what the effect of the 20 anxiety is on someone's daily life? 21 A Sometimes they do, and sometimes they 22 don't. 23 Q Okay. But when you use the word labile, 24 what do you mean? 25 A Rapidly changing.</p>

Condensed!

Page 141	Page 143
<p>1 Q So that one minute you are happy, the next</p> <p>2 minute you might be sad, you may be responding to</p> <p>3 something that's insignificant in an abnormal way,</p> <p>4 would that be fair?</p> <p>5 A I think that would be correct.</p> <p>6 Q And with regard to that, assuming that a</p> <p>7 lot of the questions asked of you dealt with the</p> <p>8 period of 2000, 2001, 2002, and now we are into</p> <p>9 2003, assuming that Mr. Mazzamuto is not even</p> <p>10 working at that time, whether the emotional</p> <p>11 condition is primary or close or whether the back is</p> <p>12 a close second, you are giving these relevant</p> <p>13 positions not in terms of his work, but in terms of</p> <p>14 the way he appears, is that right?</p> <p>15 A That's correct.</p> <p>16 Q So that although the questions asked of</p> <p>17 you in a case of law where we are dealing with</p> <p>18 disability could be misinterpreted by the jury as to</p> <p>19 have to do with his work, you were using it not in a</p> <p>20 work context?</p> <p>21 A That's correct.</p> <p>22 MR. ANGINO: I have no further questions.</p> <p>23 MR. WOLGEMUTH: Three or four questions,</p> <p>24 Doctor.</p> <p>25 RECROSS EXAMINATION</p>	<p>1 incorrect.</p> <p>2 MR. ANGINO: I have to object just</p> <p>3 because you left out the main thing, the standing.</p> <p>4 MR. WOLGEMUTH: Okay. I will do the</p> <p>5 standing.</p> <p>6 MR. ANGINO: Because that's the principal</p> <p>7 one, yeah.</p> <p>8 MR. WOLGEMUTH: Okay. I will include</p> <p>9 standing as one of his --</p> <p>10 THE WITNESS: Right. It could be wrong</p> <p>11 under some conditions though. Again, there have</p> <p>12 been times when his emotional state would have</p> <p>13 prevented him from doing some of those things, and</p> <p>14 there are times when probably it wouldn't have.</p> <p>15 BY MR. WOLGEMUTH:</p> <p>16 Q Okay. So, Doctor, what I hear you saying</p> <p>17 that -- that presently, you know, again, looking at</p> <p>18 all those job duties, Mr. Mazzamuto could do some of</p> <p>19 those duties?</p> <p>20 A He could do some of those duties for some</p> <p>21 period of time. Now, what the result of that would</p> <p>22 be on whether his symptoms would flare again, would</p> <p>23 the anxiety rebound, would his back get worse, I</p> <p>24 don't know.</p> <p>25 Now, as I said before, anybody can do</p>
Page 142	Page 144
<p>1 BY MR. WOLGEMUTH:</p> <p>2 Q Counsel just asked you a question as to,</p> <p>3 you know, if you were reviewing Mr. Mazzamuto's</p> <p>4 position at his restaurant to include things like</p> <p>5 lifting, and cooking, and ordering, and supervising,</p> <p>6 and look at it globally, I believe your testimony is</p> <p>7 that you believe he is unable to perform those</p> <p>8 duties?</p> <p>9 A That's correct.</p> <p>10 Q Now, if you were wrong in your assessment</p> <p>11 of what he does there, do you agree that your</p> <p>12 opinion would be incorrect?</p> <p>13 A Well, if my opinion of what he does is</p> <p>14 wrong in that he is current -- or he is able -- he's</p> <p>15 doing all those things, well, yeah, it would be</p> <p>16 wrong.</p> <p>17 Q I think you are misunderstanding my</p> <p>18 question. If -- in fact, Doctor, if Mr. Mazzamuto</p> <p>19 doesn't do or wasn't doing a lot of lifting, and a</p> <p>20 lot of cooking, and a lot of heavy work like that</p> <p>21 prior to, you know, his heart attack in July of</p> <p>22 2000, if he wasn't doing those duties, but doing</p> <p>23 more administrative and more supervisory duties,</p> <p>24 would you agree that the opinion you are rendering</p> <p>25 pursuant to Mr. Angino's question would be</p>	<p>1 almost anything now and again for a short period of</p> <p>2 time in an extreme circumstance, but when I'm</p> <p>3 looking at this disability, my understanding is is</p> <p>4 it's something he can kind of do day in and day out</p> <p>5 on a regular basis, and again, I think he could</p> <p>6 probably do some of those things some of the time,</p> <p>7 but, you know, based on what he -- where he's been</p> <p>8 before, you know, if he's back there doing</p> <p>9 administrative things, and suddenly something is</p> <p>10 going wrong, and he can't really do anything about</p> <p>11 it because his back holds him back, could he get all</p> <p>12 emotional again, could he get -- you know, fly off</p> <p>13 in a rage, could he do all those things that he was</p> <p>14 doing for a period of time, I think it's possible to</p> <p>15 go back. It's possible it couldn't, and I don't</p> <p>16 know that. I can't see the future.</p> <p>17 Q Okay. And, Doctor, Mr. Angino had asked</p> <p>18 you about, you know, the development of stenosis,</p> <p>19 and the progression of stenosis. Would you agree</p> <p>20 with me that surgery could relieve the effects of</p> <p>21 stenosis?</p> <p>22 A Surgery can relieve it in many cases, but,</p> <p>23 again, the result are always you don't know.</p> <p>24 Q Okay. And do you agree, Doctor, that</p> <p>25 something like steroid shots that, in fact,</p>

Condensed!

Page 145

1 Mr. Mazzamuto gets, could also alleviate the
2 symptoms of stenosis?

3 A Well, they can, but he has had numerous
4 rounds of them, and they have been short-lived at
5 best, and they come back. Stenosis is harder to
6 deal with than a herniated disk because, again, you
7 are dealing with a bony problem, and bones don't
8 regress. There's always a little inflammation
9 around the bones, the soft tissues could swell, and
10 that's why you can get these varying symptoms, but
11 the problem is the bone in a stenotic canal it's
12 always bone, it's always hard, and it doesn't
13 change. It doesn't shrink, it doesn't move, it
14 doesn't go anywhere. It's the surrounding tissues
15 that you might have a little impact with.

16 With a ruptured disk because that's a
17 gelatinous material, things like steroid shots and
18 stuff are often much more beneficial, and can you
19 give you much more long lasting success, but
20 Mr. Mazzamuto has had numerous epidural steroid
21 shots, and even when he gets them now, sometimes
22 they seem to give him some benefit for a while,
23 sometimes they don't. But this is a harder thing to
24 treat with medicine and epidural steroid injections
25 because of the nature that it's a bony encroachment,

Page 146

1 it's not a soft tissue problem primarily.

2 Q Okay. And the surgery, what would they
3 do, they would try to take out the bony
4 impingements, is that --

5 A No. Well, usually what they do is they
6 actually take off the backs of the spine here to
7 open up the canal from the other side. Now, can
8 they get in there and try to shave things away, I
9 don't know the details of that kind of surgery, but
10 when they do a decompression, they usually take out
11 some of these posterior elements because, again,
12 it's being pushed from this side, so if you pull
13 thing off on that side, it gives it more room, more
14 places to expand.

15 MR. WOLGEMUTH: That's all the questions
16 I have, Doctor.

17 MR. ANGINO: Thank you.

18 MR. SIMMERS: This concludes the
19 deposition. The time is 6:03 p.m.

20 I hereby certify that the proceedings and
21 evidence taken by me in the within matter are fully
22 and accurately indicated in my notes, and that this
23 is a true and correct transcript of same.

**SOCIAL SECURITY ADMINISTRATION
Office of Hearings and Appeals**

DECISION

IN THE CASE OF

CLAIM FOR

VINCENZO MAZZAMUTO
(Claimant)

Period of Disability and
Disability Insurance Benefits

(Wage Earner)

196-56-5744
(Social Security Number)

INTRODUCTION

On April 24, 2001, the claimant protectively filed an application for disability insurance benefits. The claim was denied initially, and a Request for Hearing was timely filed on October 1, 2001. Because there is sufficient evidence to establish disability based upon the evidence in the record, an oral hearing was not held. The claimant alleges disability beginning July 22, 2000 due to stenosis of the spine, a heart attack, and stress (Ex. 1E). Trudy H. McGraw, an attorney, represents the claimant in this matter.

The general issue is whether the claimant is entitled to a period of disability and disability insurance benefits under Sections 216(i) and 223 of the Social Security Act. The specific issue is whether he is under a disability, which is defined as the inability to engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment that can be expected to result in death or that has lasted or can be expected to last for a continuous period of not less than 12 months.

With respect to the claim for disability insurance benefits, there is an additional issue pertaining to insured status. A review of the claimant's earnings record reveals that he has earned sufficient quarters of coverage to remain insured at least through the date of this decision.

After careful consideration of the entire record, I conclude that a fully favorable decision on behalf of the claimant is appropriate at step five of the sequential evaluation process.

EVALUATION OF THE EVIDENCE

Exhibit B

VINCENZO MAZZAMUTO (196-56-5744)

Page 2 of 5

The claimant is a 47-year-old individual with a limited seventh grade education and past relevant work as a restaurant owner. He has not engaged in substantial gainful activity at any time since the alleged onset date.

The claimant has the following medically determinable severe impairments: degenerative disc disease and coronary artery disease. The medical evidence of record establishes that the claimant has a significant history of low back pain since at least 1996. The medical records reveal that the claimant experiences severe low back pain, which has been chronic and unrelenting despite numerous aggressive interventions. Treatment records show that the claimant has been on multiple medications, that he has received physical therapy, that he has received treatment from a pain clinic, and has received numerous local epidural steroid injections, all of which have only minimally attenuated his symptoms. In addition to debilitating back pain, the evidence also establishes that the claimant suffered a myocardial infarction and required cardiac catheterization on July 24, 2000. Although the evidence establishes that the claimant's coronary condition is relatively stable, he continues to experience debilitating back pain. An August 4, 2000 medical report indicates that the claimant was experiencing worsening back pain with radiculopathy into the posterior aspect of both thighs. On March 12, 2001, the claimant was still complaining of back pain going down his right buttock and down into his leg as well as anterior right thigh burning. It was noted that walking and sitting for any length of time seem to aggravate this condition. Upon examination, there was tenderness to palpation in the lumbosacral spine. A lumbar spine MRI performed on October 17, 2001 revealed degenerative desiccation and diffuse degenerative bulge of the L3-4 and L4-5 intervertebral discs. The neural canal was significantly narrowed at L3-4 consistent with focal spinal stenosis. A December 19, 2001 treatment note indicates that the claimant has difficulty sleeping because of the pain. Daniel E. Gelb, M.D. indicated in an orthopedic evaluation report of January 4, 2002 that the claimant continues to have primary back pain with significant symptoms in the legs, which occur either with prolonged standing or sitting. Dr. Gelb concluded that the claimant is a candidate for lumbar decompression. Douglas J. Bower, M.D. indicated in a report of January 31, 2002 that the claimant's most significant problem is his low back discomfort. Dr. Bower indicated that the claimant has ongoing discomfort, both with sitting and standing and that he is unable to lift. Dr. Bower concluded that the claimant was incapable of working (Exs. 1F-6F and 12F-15F).

The claimant stated in the record that he experiences bad back pain with pinching, trembling, and a burning sensation in his legs. He reported that sitting and standing for any length of time aggravate his pain and noted that he must rest between activities. The claimant reported that pain disturbs his sleep regularly and that pain interferes with his ability to concentrate. He indicated that medications cause constipation as a side effect.

The allegations of the claimant are credible based on the medical evidence and the criteria of 20 CFR 404.1529 and SSR 96-7p.

The claimant does not have an impairment that meets or equals the criteria of any listed impairment. A determination must therefore be made of whether he retains the residual functional capacity to perform the requirements of his past relevant work or can adjust to other work.

VINCENZO MAZZAMUTO (196-56-5744)

Page 3 of 5

I realize that the claimant also has a severe anxiety disorder. However, since a fully favorable decision is appropriate based on physical impairments alone, functional limitations attributable to the claimant's mental impairment have not been assessed.

The evidence of record supports a finding that the claimant retains the residual functional capacity to lift or carry and push or pull 2-3 pounds occasionally and no weight frequently, stand or walk 1 hour per 8-hour workday and sit 4 hours per 8-hour workday with a sit/stand option. Additionally, he is only able to engage in bending, stooping, kneeling, climbing, crawling, or crouching on an occasional basis. Based on these limitations, the claimant retains the residual functional capacity for significantly less than the full range of sedentary work.

I have given significant weight to the above-mentioned opinion dated April 16, 2002, of Dr. Bower finding the claimant unable to work (Ex. 15F), as it is supported by the clinical findings contained in the record as well as the degree of treatment required. As for the opinion dated June 18, 2001 of the State Agency medical consultant finding that the claimant retained the capacity to perform light work activity (Ex. 8F), it has been given limited weight as it is inconsistent with the other substantial evidence, some of which was unavailable for review by the State Agency consultant.

In his former work as a restaurant owner, the claimant was required to perform skilled light exertional level work activity. Because the claimant is limited to significantly less than the full range of sedentary work, he is precluded from the performance of his past relevant work.

As the claimant has demonstrated that he lacks the residual functional capacity to perform the requirements of any past relevant work, the burden shifts to the Social Security Administration to show that there are other jobs that the claimant can perform. This determination is made in conjunction with the Medical-Vocational Guidelines of Appendix 2 of Subpart P of the Regulations (20 CFR Part 404). Appendix 2 contains a series of rules that direct a conclusion of either "disabled" or "not disabled" depending upon the claimant's age, education, work experience, and residual functional capacity.

Born May 25, 1955, the claimant was 44 years old on July 22, 2000. For the purpose of this decision, he is considered to be a younger individual. He has a limited education and has a skilled work background. However, considering the nature and extent of the claimant's functional limitations, it is reasonable to conclude that there are no occupations to which the claimant's acquired work skills could transfer.

The claimant's capacity for the full range of sedentary work is reduced by additional limitations that narrow the range of work he can perform. Considering these limitations within the guidelines of Social Security Ruling 96-9p, there are no occupations with jobs existing in significant numbers in the national economy which the claimant could perform. A finding of "disabled" may therefore be reached within the framework of Medical-Vocational Rule 201.25.

VINCENZO MAZZAMUTO (196-56-5744)

Page 4 of 5

In accordance with a finding that the claimant has been under a disability beginning July 22, 2000, he is entitled to disability insurance benefits on the basis of his application protectively filed on April 24, 2001.

FINDINGS

After careful consideration of the entire record, I make the following findings:

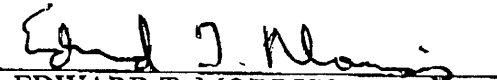

1. The claimant has not engaged in substantial gainful activity since July 22, 2000.
2. The medical evidence establishes that the claimant has the following severe impairments: degenerative disc disease and coronary artery disease.
3. The claimant has no impairment that meets or equals the criteria of any impairment listed in Appendix 1, Subpart P, Regulations No. 4.
4. The claimant's assertions concerning his ability to work are credible.
5. The claimant retains the residual functional capacity to lift or carry and push or pull 2-3 pounds occasionally and no weight frequently, stand or walk 1 hour per 8-hour workday and sit 4 hours per 8-hour workday with a sit/stand option. Additionally, he is only able to engage in bending, stooping, kneeling, climbing, crawling, or crouching on an occasional basis. Based on these limitations, the claimant retains the residual functional capacity for significantly less than the full range of sedentary work.
6. The claimant is unable to perform the requirements of his past relevant work.
7. The claimant's residual functional capacity for the full range of sedentary work is reduced by additional limitations.
8. On July 22, 2000, the claimant was a younger individual.
9. The claimant has a limited education.
10. The claimant has a skilled work background. However, considering the nature and extent of the claimant's functional limitations, it is reasonable to conclude that there are no occupations to which the claimant's acquired work skills could transfer.
11. Considering the claimant's additional limitations, he cannot make an adjustment to any work that exists in significant numbers in the national economy; a finding of disabled is therefore reached within the framework of Medical-Vocational Rule 201.25.
12. The claimant has been under a disability, as defined in the Social Security Act, since July 22, 2000 (20 CFR §404.1520(f)).

VINCENZO MAZZAMUTO (196-56-5744)

Page 5 of 5

DECISION

It is my decision that, based on the application protectively filed on April 24, 2001, the claimant is entitled to a period of disability commencing July 22, 2000, and to disability insurance benefits under Sections 216(j) and 223, respectively, of the Social Security Act.

Policy: 44 904 932
Claim: 368 799

Dear Mr. Mazzamuto:

I am writing in reference to the above claim for Waiver of Premium Disability benefits on the above policy. Thank you again for your patience while we reviewed this life claim.

The Waiver of Premium Benefit provision of your policy contract states, in part, that total disability means that because of disease or bodily injury, you cannot do any of the essential acts and duties of your job or any other job for which you are suited based on schooling, training or experience. If you are able to do some, but not all of these acts and duties, disability is not total.

However, the Company has taken a more liberalized view of total disability as it pertains to an insured's occupation. This liberalization allows us to waive premiums for up to two years after the onset of the disability based on your being totally disabled from performing the material duties of your occupation as a restaurateur. This is an administrative exception and does not affect the terms of your contract.

Therefore, I am pleased to inform you that we will waive the premiums on the above policy from July 22, 2000, the first date we have evidence of your total and continuous disability (under the liberalized terms stated above), to the premium due August 4, 2002.

A check for a refund of the August 2000 and 2001 Annual premiums has been sent under separate cover.

Mr. Mazzamuto, I wish you continued success in your future endeavors. Please let me know if you have any questions.

Sincerely,

Therese A. Sindelar Ext 8724

... for the unfettered exchange of ideas about insurance

Vol. 30, No. 6

June, 2003

UNUMPROVIDENT CORPORATION AND THE GEORGIA COMMISSIONER

UnumProvident Corporation, through its operating subsidiaries, dominates the disability insurance market in the United States. The companies' controversial claims practices are discussed in our February 2003 special issue on UnumProvident and our April/May 2003 special issue on insurance claims.

On March 19, John W. Oxendine, the insurance commissioner of Georgia, issued an order stemming from a market conduct examination of the UnumProvident companies' claims practices. The order raises procedural questions, and UnumProvident issued a distorted press release about the order.

The Order

Commissioner Oxendine fined four UnumProvident companies a total of \$1 million, ordered them to change their claims practices, and placed them on probation for two years. Also, he will continue to examine their claims practices during the probationary period, and the continuing examination will include quarterly reviews of Georgia claims that are denied. The text of the order is in the box on page 215.

The order did not name Colonial Life & Accident Insurance Company (Columbia, SC), a subsidiary of UnumProvident. In response to my inquiry, a spokesman for the Georgia insurance department said Colonial was not included in the examination because the department had not received complaints about Colonial's claims practices.

Unofficial Comments

Articles about Commissioner Oxendine's order appeared in several news outlets. The articles included comments that were attributed to him, but that did not appear in the order or in the press release accompanying the order. Some of the comments were in quotation marks. Others were not, suggesting they

were paraphrases of what he said. Here are the unofficial comments attributed to Commissioner Oxendine:

- People were being denied claims unfairly.
- Policyholders complained about disability claims being rejected or, once approved, being canceled later.
- We believe there was a corporate philosophy of pushing the envelope to the edge, of looking for every technicality possible to get out of paying the claim.
- We told them they are going to change the way they do business and change their fundamental corporate philosophy.
- No longer will claims personnel override medical decisions.
- The department met resistance initially, but the company became more cooperative when I started imposing a fine of \$5,000 a day.
- The quarterly review process is extremely unusual. I've never seen it done in the country before.
- The fine is the largest ever levied by the insurance department.
- UnumProvident wasn't accused of breaking the law.

The Confidentiality Issue

In our February 2003 issue, which went to the printer in late December, I mentioned the Georgia department's market conduct examination of the UnumProvident companies' claims practices. When I called the department in the middle of December, the spokesman said he expected the report of the examination to be made public by the end of December. When I called in early January, he said he expected the report to be made public by the end of January. When I called in early February, he said he did not know when the report would be made public.

After I received the order, I filed a request under the Georgia statute governing access to public records. I asked for a copy of the report covering the initial phase of the market conduct examination, now that the initial phase is completed. The request was denied because the examination "has been extended for an additional period of two years," and because "examination reports and records of pending examinations are not available for public disclosure until they are finalized." Describing the examination as "pending" at this late date (the examination began more than two years ago) is a clever way to keep the report confidential for at least two more years.

Commissioner Oxendine should have treated the initial phase of the market conduct examination as complete upon issuance of the order, and should have made the report on the initial phase available to the public. His failure to do so deprives the public of timely access to important information.

The Missing Allegations

Allegations that the UnumProvident companies' claims practices violate Georgia statutes or regula-

tions are missing from Commissioner Oxendine's order. Indeed, as indicated above, he was quoted in a news article as saying he was not accusing the companies of breaking the law. In the absence of such allegations, imposing fines raises questions about the procedures followed by the Georgia department.

What was the basis for the fines? What purposes were served by the fines? Why did the UnumProvident companies pay the fines? Surely the fines were not "necessary at this time for the protection of Georgia consumers," as stated in the order. As for punishment or deterrence, fines totaling \$1 million are no more than a light slap on the wrist for an organization with annual premium revenue of more than \$6 billion.

Under normal procedures, the regulator alleges violations, and the company denies the allegations. If the matter is settled, the agreement would involve a fine or other punishment, and the company would not admit to the violations. If the matter is not settled, the matter would go to an administrative law judge or a court. In short, the absence of allegations in this instance is extraordinary.

Avoiding the Issue

Because of the missing allegations, I inquired about the basis for the fines. In response, the department spokesman said the parties agreed on the fines. That response avoids answering the question.

I think UnumProvident agreed to the fines—and may even have suggested the fines—for three reasons. First, UnumProvident wanted the order to contain no allegations, because allegations by a regulator might have been damaging to the company in its defense of the many lawsuits relating to claims practices. Second, UnumProvident wanted the report of the market conduct examination to remain confidential. Third, UnumProvident wanted to help Commissioner Oxendine issue an order that would appear significant.

The UnumProvident Press Release

UnumProvident issued a distorted press release about Commissioner Oxendine's order. UnumProvident referred to the order as an "agreement" in the title of the press release ("UnumProvident Reaches Agreement with Georgia Department of Insurance") and throughout the text of the press release. UnumProvident referred to the \$250,000 fine imposed on each of the four companies as a "settlement amount." UnumProvident failed to mention that the companies were placed on probation. UnumProvident said the "settlement amount stemmed largely from early delays on the part of the company in responding to requests for information," and failed to mention the practices that the companies were ordered to change. UnumProvident characterized the market conduct examination as a "standard oversight function," and failed to mention that complaints triggered the examination. UnumProvident blamed the problems

fits of \$8.5 million. Thomas R. Watjen, who was vice chairman and chief operating officer, was appointed president and chief executive officer on an interim basis. Two outside members of the board of directors were appointed co-chairmen. Another outside director was appointed to chair a search committee of the board, which will consider Mr. Watjen as well as external candidates.

Neither the UnumProvident press release nor the newspaper articles I have seen mention Ralph W. Mohny, who Mr. Chandler brought in "to move Provident from a claim payment to a claim management approach." Whether the firing of Mr. Chandler and the appointment of a new chief executive will produce substantive changes in the UnumProvident companies' claims practices remains to be seen.

*Lets hope so
GKR*

INCOME TAXATION OF DISTRIBUTIONS TO POLICYHOLDERS IN DEMUTUALIZATIONS

The Internal Revenue Service (IRS) and the mutual insurance companies that demutualized in recent years told policyholders about the income tax treatment of the distributions the policyholders received in exchange for their ownership interests in the companies. Early this year, C. D. Ulrich, a certified public accountant who has studied the subject carefully, brought to my attention his belief that the treatment mentioned by the IRS and the companies is incorrect, that the treatment is extracting from policyholders billions of dollars of unwarranted taxes, and that policyholders who have already paid taxes on distributions should file amended tax returns and seek refunds.

When Mr. Ulrich contacted me, I found it difficult at first to believe that there might be no statutory authority for the tax treatment mentioned by the IRS and the companies. After studying the matter, however, I believe that the treatment mentioned by the IRS and the companies is open to serious question. The purposes of this article are to describe the tax treatment mentioned by the IRS and the companies, discuss the absence of statutory support for that treatment, describe the tax treatment Mr. Ulrich suggests, and indicate what a policyholder might do.

A Note on Terminology

A mutual insurance company is a corporation that is engaged in the business of insurance, has no shareholders, has policyholders who are customers with ownership interests, and is operated exclusively for the benefit of the policyholders. I say individual policyholders have "ownership interests"—rather than saying they are owners—because they have some but not all the characteristics of owners. A policyholder has the right to vote on certain matters and the right to share in certain distributions, but those rights terminate when his or her policy terminates. In short, a mutual insurance company's policyholders as a group own the company, and individual policyholders of the company have ownership interests.

Some mutual insurance companies, including especially those who downplay the rights of the policyholders, call the policyholders "members" and say they have "membership interests." The IRS uses the phrases "equity interests" or "proprietary interests." In

this article, except when quoting others, I use the expression "ownership interests."

The IRS/Company Approach

Here, in brief, is how the IRS and the demutualizing companies explain the income tax treatment of demutualization distributions. For the policyholder who receives shares of stock, there is no immediate taxable income; however, when the shares are sold, the policyholder's basis in the shares is zero and the full amount received in the sale is a capital gain. For the policyholder who receives cash, the full amount received is taxed immediately as a capital gain. In either case, whether it is a long-term capital gain or a short-term capital gain depends on when the policyholder first acquired his or her ownership interest; because the typical policyholder purchased his or her first policy in the company more than one year before the distribution, the amount received in most instances is a long-term capital gain. In this article, I refer to the tax treatment described by the IRS and the companies as the "zero basis approach."

One Company's Explanation

Provident Mutual Life Insurance Company (Provident) demutualized in 2002 and immediately became a subsidiary of Nationwide Financial Services, Inc. (Nationwide). In exchange for their ownership interests, eligible Provident policyholders received shares of stock in Nationwide.

Nationwide said in an information brochure sent to each policyholder with the distribution that the value of his or her ownership interest in Provident was \$28.0146 (the volume-weighted average sales price per share during the 15 trading days ended September 24, 2002) multiplied by the number of shares allocated to the policyholder. The joint proxy statement/prospectus (proxy) sent to policyholders in August 2002, in the section entitled "Material Federal Income Tax Consequences," said on page 58 that "your tax cost or 'basis' for any shares you receive will be zero." The law firm of Debevoise & Plimpton provided a tax opinion to Provident's board of directors. The opinion, dated August 2, 2002, was in the proxy and included this sentence:

on "disruptions" associated with the 1999 merger, and failed to mention the continuing complaints about the companies' claims practices.

The Chandler Firing

Commissioner Oxendine's order was consented to by J. Harold Chandler, chairman, president and chief executive officer of UnumProvident and its sub-

sidaries. Twelve days later, on March 31, UnumProvident announced that the board of directors fired Mr. Chandler. The firing was not necessarily related to the Georgia situation or any other single development.

In accordance with his current employment contract, which was executed in 1999, Mr. Chandler will receive \$17 million—severance pay of \$8.5 million (three times base salary and bonus) and pension bene-

COMMISSIONER OXENDINE'S ORDER (MARCH 19, 2003)

WHEREAS, the Commissioner of Insurance (hereinafter the "Commissioner") commenced an examination of the records and activities of Unum Life Insurance Company of America, The Paul Revere Life Insurance Company, Provident Life and Accident Insurance Company, and Provident Life and Casualty Insurance Company (hereinafter the "Respondents"); and

WHEREAS, pursuant to Georgia law, the Commissioner may use information discovered or developed during the course of an examination in furtherance of any legal or regulatory action which the Commissioner may, in his sole discretion, deem appropriate; and

WHEREAS, during the initial period of examination, the Commissioner has determined that certain issues associated with the handling of claims, complaint resolution, and record maintenance warrant further examination; and

WHEREAS, notwithstanding the further examination of Respondents as set forth herein, the Commissioner has determined that certain actions are necessary at this time for the protection of Georgia consumers.

NOW THEREFORE, upon consideration thereof, the Commissioner hereby places Respondents on regulatory probation for a period of 2 years. The terms are as follows:

1. Each of the Respondents shall immediately pay a monetary penalty in the amount of \$250,000.

2. The market conduct examination of the Respondents, initiated by Certificate 2000-MC15 and initially covering the period of January 1, 1999 through November 30, 2000 (the "initial exam period") shall be extended and continue through the period of regulatory probation. The scope of the examination will include further investigation of certain issues identified during the initial exam period and the monitoring of current claims handling practices as described below.

3. As part of the continuing market conduct examination of the Respondents, a quarterly review of Georgia claims by a qualified examiner with knowledge and experience in the area of disability insurance to be selected by the Commissioner shall be performed for each quarter for 2 years from the date of this Order. Claims to be reviewed will be claims and/or complaints (whether previous, pending, or future) submitted by Georgia residents, and the claims and/or complaints selected shall include but not be limited to consumer complaints received by the Commissioner and Respondents and random samples of denied claims.

4. Respondents agree to be sensitive to claims in which a narrow interpretation of policy provisions or

legal principles may lead to an unfair result. Respondents will consider, and, on a case-by-case basis, will make exceptions to such narrow interpretations, particularly in claim cases involving more subjective determinations, in order to accomplish a fair result. Any such exception will be consistent with the medical findings in the case, normal and customary application of the relevant policy provisions and applicable legal principles.

5. Claims personnel will not overrule medical opinions relating to the disability status of a claim that is provided by a more highly trained and/or qualified professional without concurrence of an equally trained and/or qualified professional.

6. Respondents shall provide improved communications to claimants regarding denial and the availability of the appeals process. Such communications shall accurately and clearly explain the disability definition and basis for denial and refer to specific language in the policy that is relevant to the decision.

7. Respondents shall maintain copies of applicable policy forms or provisions in the claim files. Additionally, Respondents shall adhere to Respondents' policy of maintaining copies of medical records in the claim files.

8. Respondents shall improve tracking and availability of claims files and complaint files.

9. Respondents shall meet all applicable time standards for appropriately responding to claims filings and correspondence.

10. Respondents shall respect the privacy of claimants and will, in the process of collecting, using and determining disclosure of claim information to any third parties, act in accordance with applicable laws, regulations, policy provisions and claim policies of the Respondents.

11. Respondents shall bear all costs associated with the extended examination.

FURTHER, by consenting to this Order, Respondents agree to comply with all of the above-referenced terms of this Order and to comply with all applicable Georgia law and regulations. Respondents admit no violation of Georgia law or regulation and do not admit that the inclusion of any matter in this Order implies failure of prior compliance.

FURTHER, all terms and conditions contained herein are hereby **ORDERED**, this 19th day of March, 2003.

[Editor's note: Commissioner Oxendine signed the order. J. Harold Chandler, who was chairman, president and chief executive officer of the four UnumProvident companies at the time, consented to the order.]

UnumProvident Bad Faith: Deposition and Trial Transcript Collection

Developed Exclusively for ATLA Plaintiff Lawyers

Order Today
& Save \$50

The controversial claims handling processes of UnumProvident, the country's largest disability insurer, continues to be the subject of media and legal scrutiny. Some of Unum's employees have spoken out about the company's controversial claims handling process, where it has been widely reported that troublesome claims were discussed by employees with the goal of denying or cutting off benefits. This packet includes deposition and trial testimony from current and former Unum employees and consultants, including physicians, executives, and claims adjusters, and provides a look into Unum's claims handling inner sanctum. Inside you'll find testimony in support of the process, with opposing testimony from other deponents. A must-have for lawyers with cases against Unum. [June 2003; 718 pages]

MORE NEW PACKETS FROM THE ATLA EXCHANGE

Debt Collection Litigation Packet—Addresses issues that may arise during the collection process, including a collection attorneys' compliance with the Fair Debt Collection Practices Act, 15 U.S.C. § 1692 et seq., and the Soldiers' and Sailors' Civil Relief Act of 1940, 50 U.S.C. App. §§ 501-593, and the effect of bankruptcy filings. Included are sample letters to debtors, payment plans, spread-sheets, and client communications. [June 2003; 800 pages]

Low Impact Litigation Packet—Addresses key issues that arise in assessing and trying low impact, connective tissue cases. Contains strategies from ATLA colleagues experienced in winning these cases and in maximizing damages for their injured clients. Includes court documents, discussion about biomechanical engineers and other potential defense witnesses, ATLA Education papers, TRIAL articles, and other materials that will guide you through the nuances of trying and winning a low impact case. [April 2003; 839 pages]

Life Expectancy and Neurological Injury: Debunking the Defense "Experts"—Introduces you to the defense "experts" and alerts you to the tactics they will use to deprive your client of meaningful compensation. Includes arguments on how to persuade the court to exclude this unreliable testimony, and other court documents and depositions. Created in collaboration with ATLA members who have faced these "experts" and have succeeded in arguing for exclusion of this testimony. [April 2003; 972 pages]

April 20, 2001

Peter J. Russo
Attorney At Law
Suite 200, 5010 East Trindle Road
Mechanicsburg, PA 17050

Re: Vincenzo Mazzamuto
Claim # 13-H3236167-002

Dear Mr. Russo:

Thank you for the courtesies you extended me during our recent telephone conversation. As we discussed, we would be in contact with you, in writing to outline the status of Mr. Mazzamuto's claim. We would like to take this opportunity to do so.

According to Mr. Mazzamuto's policy, Total Disability means that the insured can not due the substantial and material duties of his or her regular job. The cause of the total disability must be an injury or sickness.

Residual Disability means, during the elimination period, that due to an injury or sickness as define in the policy, the insured:

- A. is not able to do one or more of the substantial and material duties of his or her regular job; or
- B. directly and apart from any other cause, has a loss of income as defined in the rider of at least 20%.

After the elimination period has been satisfied, residual disability means the insured has a loss of income as defined in the rider of at least 20%. The loss of income must result directly from the same or related injury or sickness used to satisfy the elimination period. The loss of income must not result from any other cause.

On Mr. Mazzamuto's initial claim form, received in our office on December 15, 2000, he indicated that his employer's name was Vinny's Restaurant, Inc. and that his duties consisted of "executive 50% and office 50%." He indicated that he was the president. On an Insured's Statement of Occupational Duties and Employment issued with the claim form, Mr. Mazzamuto indicated that he "supervised employees 20 hours per week; 50% of the time, bookkeeping 10 hours per week; 25%

Exhibit F

of the time and other office duties 10 hours per week; 25% of the time." A copy of this form has been enclosed for your reference.

Mr. Mazzamuto and I spoke on the telephone on January 4, 2001. At this time, he indicated that he was owner of Vinny's Restaurant and that his duties were mostly managerial. He stated that he does the books, orders food, writes checks, etc. He had his workers to everything else such as cook, wait tables, etc. Mr. Mazzamuto indicated that he would very rarely help out with these duties. Only when someone didn't show up for work on short notice is when he would help out. The insured also stated that he was a very "nervous" person and that he thinks that he may have had too many years in the business. His wife and son are running the restaurant at this time.

On January 15, 2001, we forwarded an Occupational Description to our Mr. Mazzamuto for completion. This form was returned to our office on January 22, 2001. Mr. Mazzamuto indicated on this form that his duties consisted of bookkeeping 15-20% of the time, office duties 15-20% of the time and employee administration 50-60% of the time. A copy of this form has been enclosed for your reference.

Please note that you indicated to me that you do not feel that Mr. Mazzamuto's occupational description is correct. Mr. Mazzamuto has indicated numerous times throughout his claim file that his occupational duties consisted of office, executive and administration duties only. You stated that you know that "Mr. Mazzamuto is only one of two cooks." This appears to be contradictory to the statements and descriptions provided to us by Mr. Mazzamuto. Please also understand that Mr. Mazzamuto filed a disability claim with The New York Life Insurance Company in 1996. At this time, he indicated that again, his occupational duties consisted of office, executive and administration duties only.

You further mentioned that at the time of application for disability coverage in 1993, you recall that Mr. Mazzamuto's duties were more extensive and that he physically ran and operated the restaurant. Upon review of Mr. Mazzamuto's two applications for disability coverage, the first signed and dated by him on June 3, 1993 and the second on August 28, 1993, he specifically indicated that his duties consisted of "executive office duties only." Copies of these documents have been enclosed for your reference. You indicated that you may contact the writing agent to inquire as to why his duties were indicated as stated. Mr. Russo, please understand that regardless of what Mr. Mazzamuto's occupation and occupational duties were at the time of application, it is his duties at the time of claim for disability benefits that we would be evaluating.

On Mr. Mazzamuto's initial claim form, he indicated that he was unable to work as of Jul 29, 2000 due to a heart attack. Dr. Douglas Bower completed the Attending Physician's Statement portion of this form. He indicated that Mr. Mazzamuto's subjective symptoms were anxiety, worry, and low back pain. He restricted the insured from no prolonged standing and no heavy lifting (secondary to his back). Dr. Bower wrote that Mr. Mazzamuto's limitations were "cannot work in stressful situations." On the Medical Provider's Statement, also completed by Dr. Bower, he indicated that the insured also suffered an acute MI.

During my telephone conversation with Mr. Mazzamuto on January 4, 2001, he indicated that he suffered a heart attack in July 2000 and when the paramedics put him into the ambulance, his back "snapped." He stated that he has had a back condition for a number of years and this re-injured an injury that was "already there." As stated, his back problems have never went away and the ambulance occurrence "just made it worse." I asked the insured about his heart condition. He indicated that it was "better" and that he attended cardiac rehabilitation. Mr. Mazzamuto stated that it is his back condition that is restricting him from not returning to work. He indicated that there is a letter from his doctor regarding his back condition and requested that I telephone your office and ask "Melissa" to forward the letter to me.

I telephoned Melissa, per Mr. Mazzamuto's request, and she forwarded me a copy of a letter from Dr. Douglas Bower, via fax. The letter was dated on November 3, 2000, and indicated that Mr. Mazzamuto had a long history of low back pain. A MRI in the past revealed central spinal stenosis which gradually worsened to a maximum at the L3-L4 level and extends from L2-L5. Prolonged standing and heavy lifting aggravate it. He has been seen in physical therapy, treated in a pain clinic with local injections as well as prescription analgesics, nonsteroidal anti-inflammatory agents and other atypical chronic pain medications. Dr. Bower indicated that this condition was complicated when he was admitted to the hospital for his heart condition. He was readmitted to the hospital at a later date, with chest pain, and this pain was subsequently felt to be non-cardiac in nature. Dr. Bower further stated "as the patient has attempted to return to work after his recovery from his heart attack, his back has worsened again, also the stress and anxiety which has been provoked because of his recent cardiac problems, and manifested themselves with significant anxiety when he is back in a work situation." It was noted that Mr. Mazzamuto's heart condition was stabilized and should hopefully not pose a great limitation on him in the future. Dr. Bower stated "at the present time he is not able to do the work required in running his restaurant because he cannot stand for a prolonged period of time, has difficulty bending, and is restricted from heavy lifting.

Upon review of all additional medical documentation, it is noted that Mr. Mazzamuto was hospitalized on July 22, 2000 for the new onset of angina, with CPK evidence of a small subendocardial Myocardial Infarction. Cardiac Catheterization demonstrated a 90% distal LAD stenosis which was dilated to a 10% residual. Other stenoses included a 50% Dg1 and several 30-40% RCA narrowings. His ejection fraction was reported as 55%. He was readmitted several weeks later for recurrent chest pain, which was different from the pain of the MI and felt not to be cardiac in origin. On August 29, 2000, he had a stress echocardiogram test and walked for 7 minutes of the Bruce Protocol (approximately 10 METs), with a peak heart rate of 115 on beta blockers, an ejection fraction of 50% increasing with exercise, apical akinesis and no evidence of inducible ischemia. In an office note dated January 11, 2001, Dr. Bower indicated that Mr. Mazzamuto was doing well, and exercising without difficulty, but had continued back pain.

With respect to Mr. Mazzamuto's lower back pain, it appears that he has had a long history of lower back pain that has been treated with Neurontin, NSAIDs, Flexeril and epidural steroid injections, about twice yearly. A CT scan on September 15, 1992 reported spinal stenosis at the L3-4 level and

L4-5 level. Following a flare-up in pain after a fall on ice in 1996, a MRI on June 5, 1996 again reported the spinal stenosis at L3-4, felt to be developmental in origin, with no evidence of DJD or disc herniation. His pain at the time was described as burning located centrally in the lower back, extending down the lateral thighs to the knees. Although prolonged standing was said to lead to leg numbness, no abnormality on neurologic exam was reported. In an office visit September 22, 1997, Mr. Mazzamuto reported that his back was better but bothered him after three hours of standing.

Mr. Mazzamuto's back pain reportedly increased again following hitting a bump during his ambulance ride to the hospital in July 2000. His most recent epidural injections were on October 18, 2000 and January 31, 2001.

With respect to Mr. Mazzamuto's cardiac condition, there appears to be no information to support a cardiac impairment which would preclude work involving sedentary to light physical activity on a full-time (40 hour a week) schedule. His physician has restricted him from stressful situations, but there does not appear to be any information to support a present cardiac impairment related to stress, either terms of a significant stress-reduced rhythm disorder or angina.

Please also note, that we forwarded Mr. Mazzamuto's claim file to our Field Claim Representative, Mr. Brian Coar. Mr. Coar met with Mr. Mazzamuto at his home on April 4, 2001. During this interview, Mr. Mazzamuto indicated that he does not really have any pain in his heart anymore and that his shortness of breath concerns him. He also stated that he is afraid that if he goes back to work and is in a stressful situation, he may have another heart attack and die. He also indicated that some of his fear stems from the history of heart problems in his family. Please note that Mr. Mazzamuto's disability policy provides for benefits when he is unable to perform the duties of his occupation on either a full or part-time basis. His policy does not provide benefits in the event he may experience a condition which may cause a disability in the future.

With reference to Mr. Mazzamuto's claimed orthopedic condition, back pain, it is noted that he claims that the pain increases with prolonged standing and his physicians restrict him from prolonged standing or walking, heavy lifting, and bending. His job does not appear to involve heavy lifting (per Mr. Mazzamuto's statements). The degree to which he is required to stand or walk for a prolonged, uninterrupted periods of time, over 15-20 minutes at a time, is not clear. However, based on the insured's numerous occupational descriptions, it appears that his job duties are sedentary and light in nature. It should also be noted that his lower back pain tends to wax and wane and although he appears to have had prolonged exacerbation's after episodes of trauma (slipping on ice and a bump during an ambulance ride), the discomfort has subsided in the past, at least enough to return to work. Also, there does not appear to be any structural change in his condition associated with the recent exacerbation.

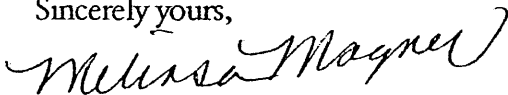

Based on all medical information in Mr. Mazzamuto's claim file, it does not appear that there are restrictions or limitations that would prevent Mr. Mazzamuto from working in his occupation on a full-time basis. Therefore, we find that he is ineligible for disability benefits under his contract.

However, if you would like to submit additional information for further consideration of his claim please send it to my attention. If you have no new information to provide but would like to appeal our determination, please send a written request for a review to:

UNUMProvident
Quality Performance Support
18 Chestnut Street
Worcester, MA 01608

Please be sure to include his social security number and claim number. Your written request should include your comments and views of the issues you wish UNUMProvident to consider. If UNUMProvident does not receive the written request within 90-days of the date of this notice, we will assume you agree with our determination.

Sincerely yours,

Melissa Wagner, X6710
